

Figure S7 | Consensus sequences and secondary structure models for additional ncRNA motif candidates or candidates with other functions discovered in this study. a, Sequence and secondary structure model for the PBC-10 motif RNA. Annotations are as described for **Fig. 3**. Palindromic sequence near the origin of the P1 stem is boxed. **b,** Genes associated with the PBC-10 motif RNA. **c-e,** Candidates containing ORFs. Annotations are as described in the legend to **Fig. 6**. **f-i** Sequence and secondary structure model for candidates with other functions. Details regarding each motif are presented in Additional file 1: Table S1.
