

A

B

Additional file 6 | A, B: The PPI network of genes/proteins expressed commonly in transcriptome and OMVs proteome from *A. baumannii* ATCC 19606 and JU0126 strains. The blue and yellow nodes represent commonly identified genes/proteins from both mRNA and OMVs proteome and red nodes represent neighboring proteins. The size of the blue and yellow nodes represented in p -value and edge size of the PPI network were represented in combine score.
