

Supplementary figure 3. SDS-PAGE analysis of whole cell proteins from *Helicobacter pylori* cell lysates (the original, unprocessed version).

Protein patterns of spiral form *Helicobacter pylori* and coccoid form *Helicobacter pylori* generated by various methods (starvation, *S. mitis* supernatant treatment, and amoxicillin treatment) were examined on 14% SDS-PAGE. SDS-PAGE, Sodium Dodecyl Sulfate-PolyAcrylamide Gel Electrophoresis; MIC, minimum inhibitory concentration.
