

Additional File 18. Some transcripts obtained from RNA-seq in *Tectona grandis* and used for subsequent analysis. Four MYB transcription factors: *TgMYB1* (NCBI Accession number KR092428), *TgMYB2* (NCBI Accession number KR092429), *TgMYB3* (NCBI Accession number KR092430), *TgMYB4* (NCBI Accession number KR092431), three *heat-shock proteins*: *TgHsp1* (NCBI Accession number KR092432), *TgHsp2* (NCBI Accession number KR092433), *TgHsp3* (NCBI Accession number KR092434), *carboxylesterase*: *TgCES* (NCBI Accession number KR092436), *bax inhibitor*: *TgBi* (NCBI Accession number KR092435). In yellow, the methionine. In green, the stop codon. In grey, the coding sequence. In blue, the real-time PCR primers.
