

Additional file 11: Summary of Rrs-7 thermomorphogenesis

(a) Developmental timing and (b) quantitative phenotypes of Bay-0 grown at 16 °C (blue), 20 °C (green), 24 °C (yellow), or 28 °C (red). Trait units (x-axis) are noted in Additional file 1. Times of phenotypic assessment for selected traits in (a) are indicated by asterisks. Part of the Rrs-7 data has been published previously as wild type control data of a mutant characterization in Delker et al. (2015).
