

Fig. S1

Additional file Fig. S1. Effects of Mn treatments on the growth of different stylo genotypes. (a) SPAD. (b) Plant dry weight. After 30 d of normal growth, stylo seedlings were treated with 5 or 400 μ M MnSO_4 for 10 d. Each bar indicates the mean of four biological replicates with standard error. The same letter represents no significant difference at the $P=0.05$ level.
