

Morphological identification, habitat description and coordinates.

Specimens identification according to morphological characteristics described in the “Key to the Mexican species of *Selaginella*” from Mickel and Smith (The Pteridophytes of Mexico, The New York Botanical Garden Press, 2004).

Sample ID: 42-18012017

Scientific name: *Selaginella sellowii* Hieron.

Location: San José del Chilar (locality), San Juan Bautista Cuicatlán, Oax, Mex.

17° 42' 56.2" N, 96° 56' 28.39" W (711 m.a.s.l.)

Vegetation: Tropical deciduous forest/scrub

Date: 18 January 2017

Sample ID: 50-27082017

Scientific name: *Selaginella lepidophylla* (Hook. & Grev.) Spring

Location: Tlacotepec (locality), Zacualpan de Amilpas, Mor, Mex.

18° 49' 19.6" N, 98° 45' 10.29" W (1789 m.a.s.l.)

Vegetation: Tropical open deciduous forest

Date: 27 August 2017
