

a

RBH
(mean identity):

Query	Subject		
	<i>S. sellowii</i>	<i>S. lepidophylla</i>	<i>S. denticulata</i>
	<i>S. sellowii</i>	71.12 %	66.52 %
	<i>S. lepidophylla</i>	71.15 %	65.31 %
	<i>S. denticulata</i>	66.52 %	65.30 %

b

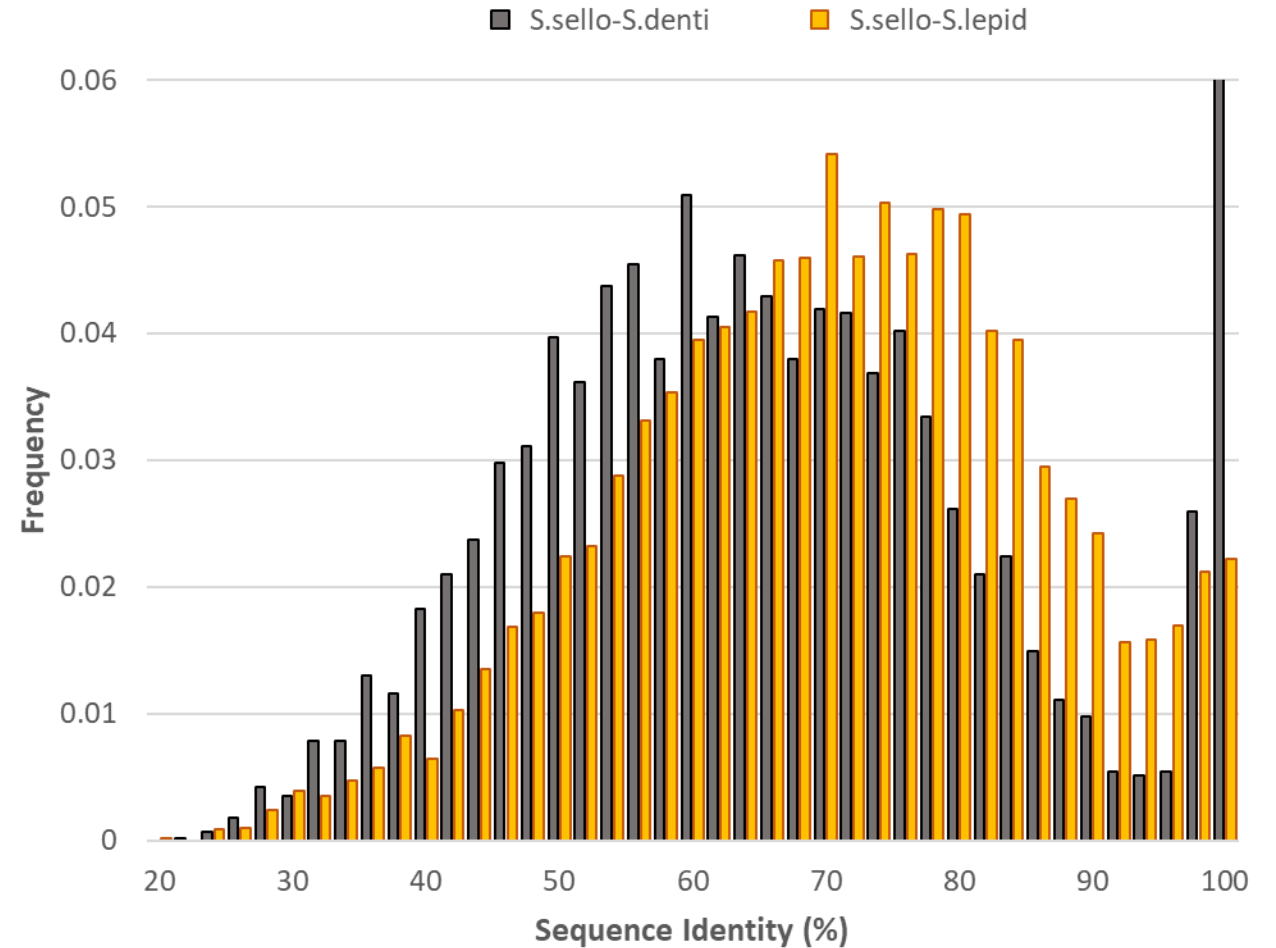

Figure S4. Comparison of protein sequence identity between *Selaginella* species.

(a) Reciprocal best hits (RBH) expressed as an average percentage identity. (b) Pairwise comparisons of frequencies of shared protein identities between *S. sellowii* (S. sello) and *S. lepidophylla* (S. lepid) and *S. sellowii* (S. sello) and *S. denticulata* (S. denti) species.
