

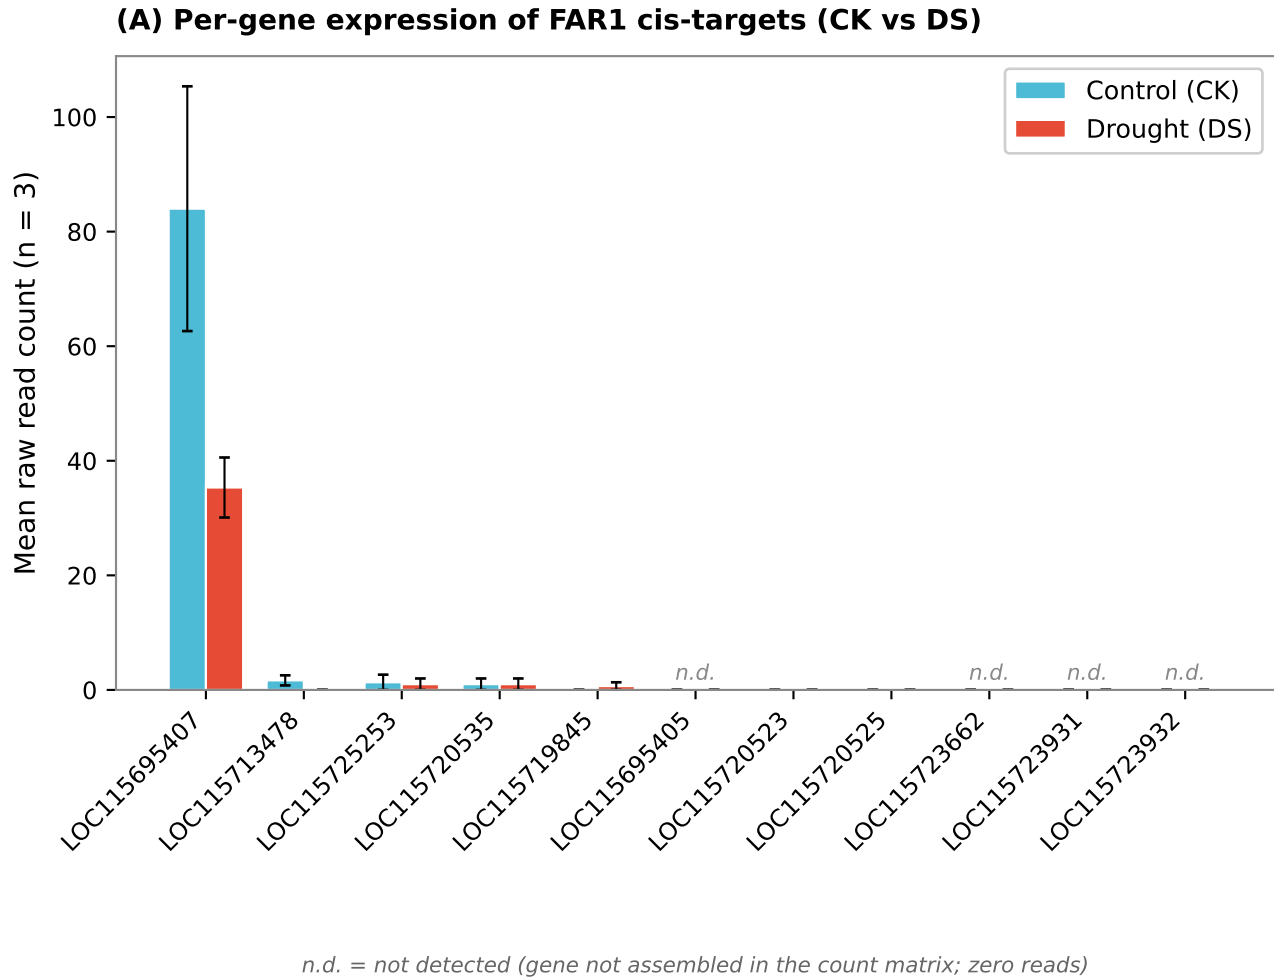

Figure S7
Expression of the 11 FAR1/FHY3 cis-target genes under control (CK) and drought stress (DS)

(B) Summary

Total FAR1 cis-target genes	11
Assembled in count matrix	7
Not detected (zero reads)	4
Mean count ≥ 10 in any group	1
Mean count < 10 (very low)	6
Significant DEGs (padj < 0.05)	0

The FAR1/FHY3 cis-target genes are expressed at low levels under both conditions in this leaf RNA-seq dataset, and none reached the differential-expression significance threshold (padj < 0.05).
