

A. Websites Utilized in the Preparation of Frequently Asked Questions

1. <https://med.stanford.edu/ra-apm/for-patients/nerve-block-questions.html>
2. <https://anesthesiology.wustl.edu/patient-care/for-patients/common-patient-questions-about-nerve-blocks/>
3. <https://www.yalemedicine.org/conditions/nerve-blocks-for-surgery>

B. Characteristics of the Evaluators

Four of the evaluators had 1-5 years of experience, three had 6-10 years, six had 11-15 years of experience, and two had over 16 years of experience as an anesthesia specialist. One of the evaluators was working as an anesthesia specialist in the United States and four in England. Four evaluators working in Turkey had Board certificates with English language exams, while one was an examiner in more than one Board exam conducted in English. The other five were academic staff at a medical school providing education in English, and all had duties in congresses and meetings where the language of presentation was English. All of the evaluators had advanced English proficiency and had attended and attended courses organized by Turkish or European Regional Anesthesia Associations.
