Study mothers :	37,469		25,795		850		1,739		1,031		1,558		27,534		2,589		65,853
Censored %	0.2		0.2		9.1		19.2		1.6		23.6		1.7		16.1		0.9

Notes:

^a Prisoners were divided into two groups; with/without mental health morbidity (MHM); or incarceration of 5 days or more (5+days) or less than 5 days (<5 days).

^b Women with mental health morbidity (MHM) had either a mental health admission episode or were authorised or receive opiate substitution therapy (OST).

^c Women censored for inconsistent maternity data have one or more of the first four listed reasons for data censoring

% rate per 1,000 person records % rate per 100 person records – not applicable
