

Amygdala

A low-magnification histological section of the amygdala, stained with hematoxylin and eosin (H&E). The tissue shows a dense population of neurons and glial cells. A black arrow points from the text label to a specific area within the tissue.

Cingulate Cortex 1

A low-magnification histological section of the cingulate cortex, stained with hematoxylin and eosin (H&E). The image shows two distinct regions of the cortex, separated by a vertical sulcus. The tissue is densely packed with neurons and glial cells.

Cingulate Cortex 2
