

eTable 2 The prevalence of delirium risk factors as determined by univariate analysis

Variables	Prevalence rate (%)
Age (90~99 years)	15.4
Single/divorced /windowed	19.6
High school/secondary technical college or above	65.4
Number of medications ≥ 5	38.8
Emergency admission	12.7
Pain	54.8
Sleep deprivation	82.4
Constipation	29.5
Cognitive impairment	36.6
ADL Impairment	81.2
Malnutrition	38.8
Depression	17.0
Infection	22.8
Comorbidities	28.7
