

Appendix 3: Interview guide

Interprofessional collaboration

- What does collaboration in the care of older patients with complex care needs mean to you?
 - How do you perceive your role in this collaborative process?
- Can you describe your experiences of collaborating with primary care, municipal care, and home care staff in the care of older patients with complex care needs?
- Can you share an example of a situation where collaboration around an older patient worked well?
 - What factors contributed to making this collaboration effective?
- Can you describe a situation where collaboration was lacking?
 - What contributed to this?
 - How did you manage the situation?
- What obstacles do you encounter in interprofessional collaboration when caring for older patients with complex care needs?
 - How do you think these obstacles could be removed or managed?

Access to information/information transfer

- What types of information do you need when caring for older patients with complex care needs?
 - Why is this information important?
 - How would you describe the current state of access to patient information? In what ways does this impact your work?
 - What methods are currently used to transfer patient information in the prehospital setting?
 - How do you obtain the patient information you need?
 - What obstacles do you face in the transfer of patient information when caring for older patients with complex care needs?
 - How could these obstacles be addressed or overcome?
-
- Is there anything else you would like to add?
