Geriatrician

Supplementary Figure S4 a) Probability of survival (left panels) and alive at one's own home (right panels) over time in response to eFI-CGA and CFS scores assessed by primary care providers (top panels) and geriatricians (bottom panels).

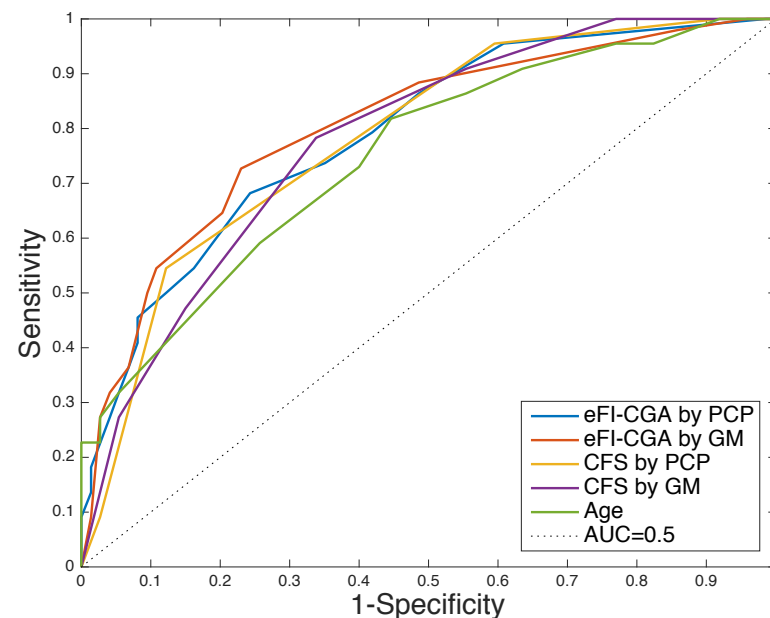

b)

Mortality

<i>Mortality Outcome</i>	AUC	95% CI		SE	Sig.
Age	0.71	0.58	0.85	0.07	.004
eFI-CGA by PCP	0.74	0.63	0.86	0.06	.001
eFI-CGA by GM	0.74	0.62	0.86	0.07	.002
CFS by PCP	0.74	0.63	0.86	0.06	.001
CFS by GM	0.75	0.64	0.87	0.06	.001

Any Adverse Event

<i>Any Adverse Outcome</i>	AUC	95% CI		SE	Sig.
Age	0.72	0.62	0.83	0.06	.002
eFI-CGA by PCP	0.78	0.68	0.89	0.05	.000
eFI-CGA by GM	0.79	0.67	0.89	0.06	.000
CFS by PCP	0.78	0.68	0.89	0.05	.000
CFS by GM	0.79	0.67	0.88	0.05	.000

Supplementary Figure S4 b) Discrimination of individuals who died (left panel) and were with combined outcome (right panel) using eFI-CGA and CFS scores assessed by primary care providers (PCP) and geriatricians (GM), compared to using age.

Note: AUC, area under receiver operating characteristics curve; CI, 95% confidence interval; SE, standard error; Sig, significance.
