

Figure S1

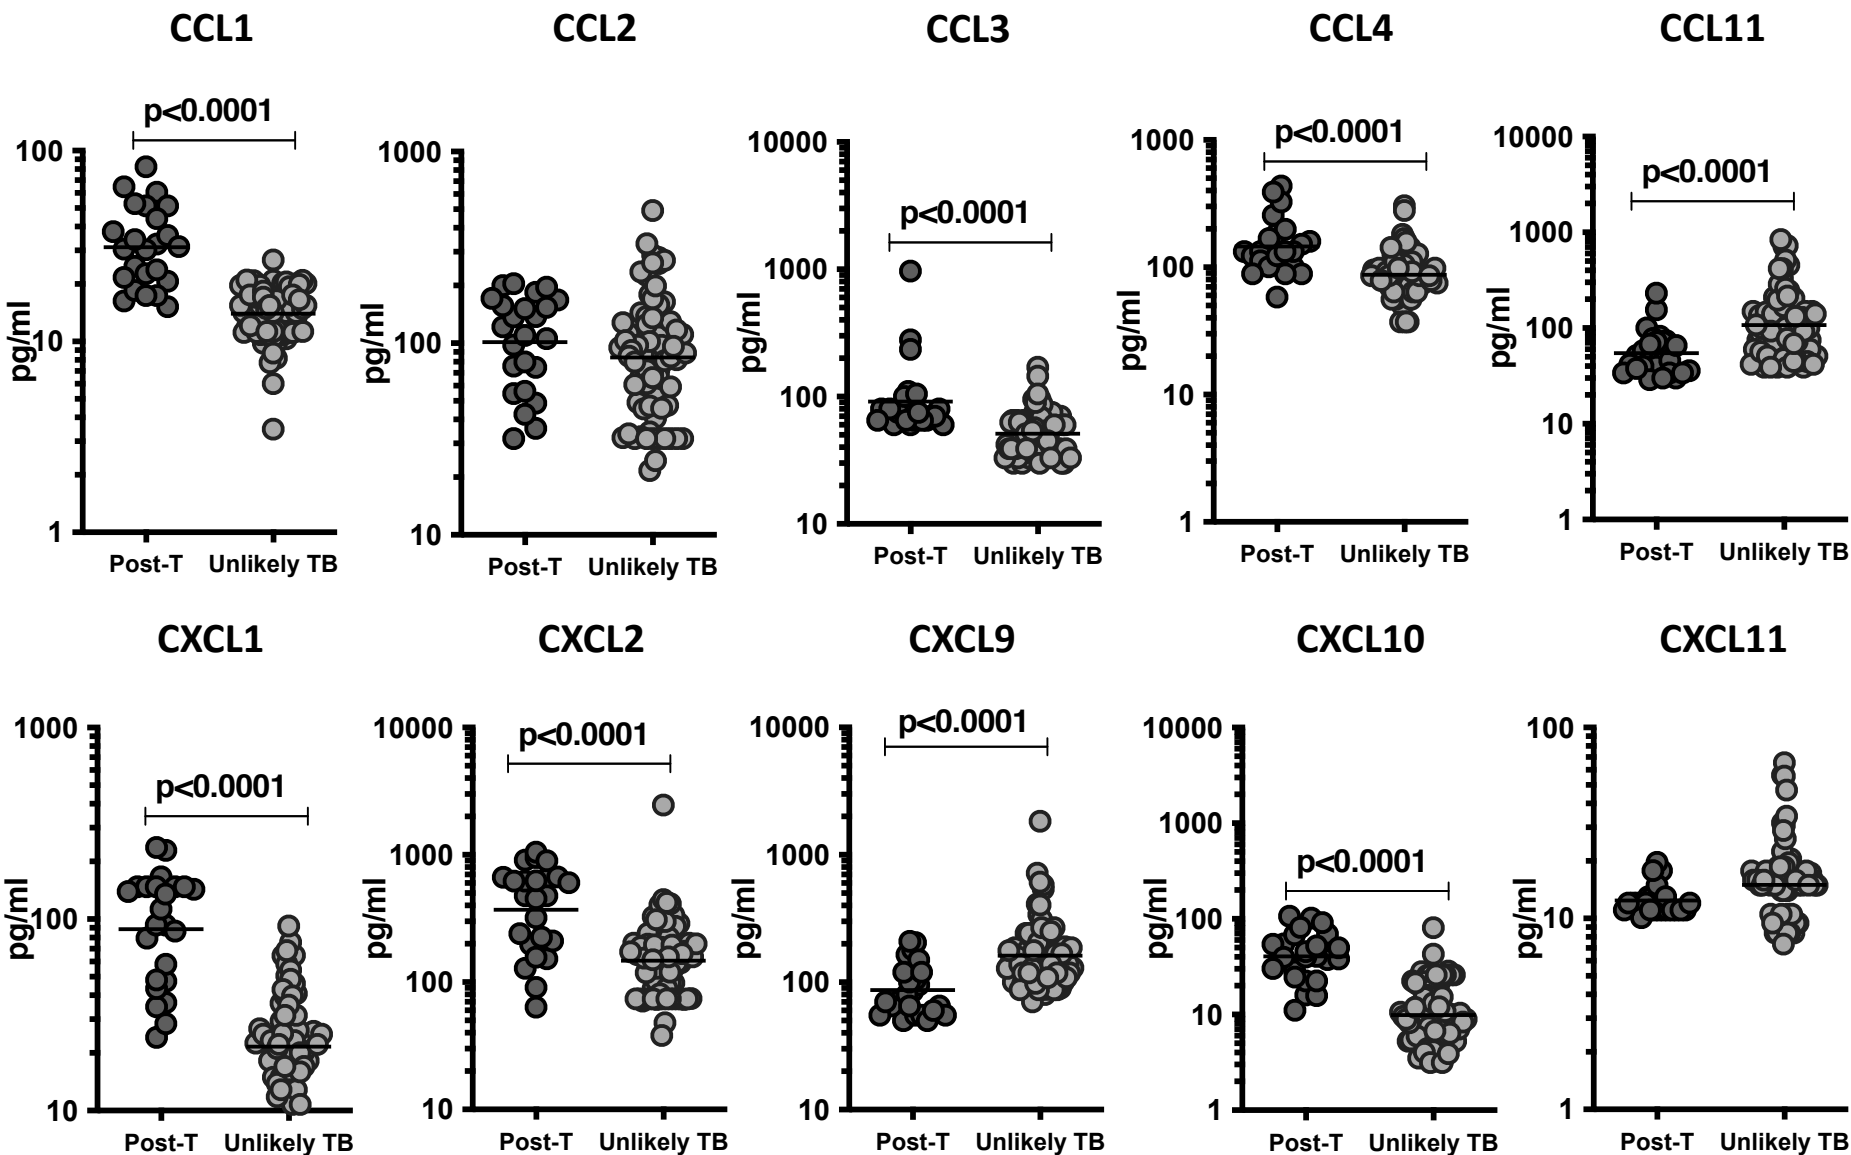

Figure S1: The plasma levels of CCL1, CCL2, CCL3, CCL4, CCL11, CXCL1, CXCL2, CXCL9, CXCL10 and CXCL11 were measured in confirmed TB individuals at 6 months of anti-TB treatment (post-T) (n=24) and unlikely TB (n=76) individuals at baseline. The data are represented as scatter plots with each circle representing a single individual. P values were calculated using the Mann-Whitney test.
