

Figure S3 related to Figure 6. Weak Correlation plots of C Reactive Protein (C-RP) with **A.** Aspartate transaminase (AST), **B.** UREA (URE), **C.** Interleukin-10 (IL-10), **D.** Interleukin-18 (IL-18), **E.** Transforming growth factor beta (TGF- β) using Spearman rank with a $\alpha=0.05$ Results are shown as r values, with the strength of correlation as follows: 0-0.19 (very weak), 0.2-0.39 (weak), 0.40-0.59 (moderate), 0.6-0.79 (strong) and 0.8-1 (very strong).
