

A

MCF-7

B**MDA-MB-231**

Figure S1. Effects of DHPM derivatives on MCF-7 (A) and MDA-MB-231 (B) cell viability. Breast tumor cells were treated with the thirty-seven DHPM derivatives (1.0 mM) for 72 h and cell viability determined by MTT assay. Data represent the mean $\pm$ SEM of 3 independent experiments each performed in triplicates. * $P < 0.05$, ** $P < 0.01$ and *** $P < 0.001$ versus untreated control group.
