

Current Situation	
Could you please start by describing your role and tasks in this clinic?	
Case Vignette	
[see separate document]	
Case Discussion	
Do you have any questions regarding this case?	Understanding
Which therapy would you recommend to the patient?	Task
Are there any alternatives to this therapy?	Therapeutic alternatives
Card Sorting	
I will now give you cards with words and we ask you to rate, which relevance these factors have for your decision.	Cards
I also give you a scale reaching from 0 to 5 whereas 5 means most important and 0 means completely irrelevant. We ask you to rate the factors on this scale. Multiple placements are possible, for example more than one card can be given the value 4. If a factor does not apply at all to your work, please rate it as „not applicable“.	Task
Are there cases where you would change this order, so weigh the factors differently?	Other cases
Does it matter, from your perspective, <i>where</i> the patient is treated?	Influence clinic / place
Interview Questions	
Would you like to add something to the case vignette? (contentwise, formally, emotionally)	Comments to vignette

Did you find the case difficult to decide? <i>If yes:</i> Could you describe another therapeutic situation which you think is difficult to decide? <i>If no:</i> What would be a therapeutic situation which is difficult to decide?	„Difficult“ situations
We have talked about the relevance of study results for your decision-making. How do you get informed about these results (source) and how do you proceed in this?	Source of information
What does Evidence-Based Medicine mean for you?	EBM
What is your experience in applying clinical guidelines to your patients? Do you experience any discrepancies between your own clinical experience, your intuition and clinical guidelines?	Experience clinical guidelines Clinical experience
Assume you were the mentor of younger colleagues: What would you advise them to do in important therapeutic decisions? What should they refrain from? What would you wish them? What has changed in your own clinical practice regarding your decision making?	Advice to young colleagues Development of decision making
