

Full-length blots of Figure 3B

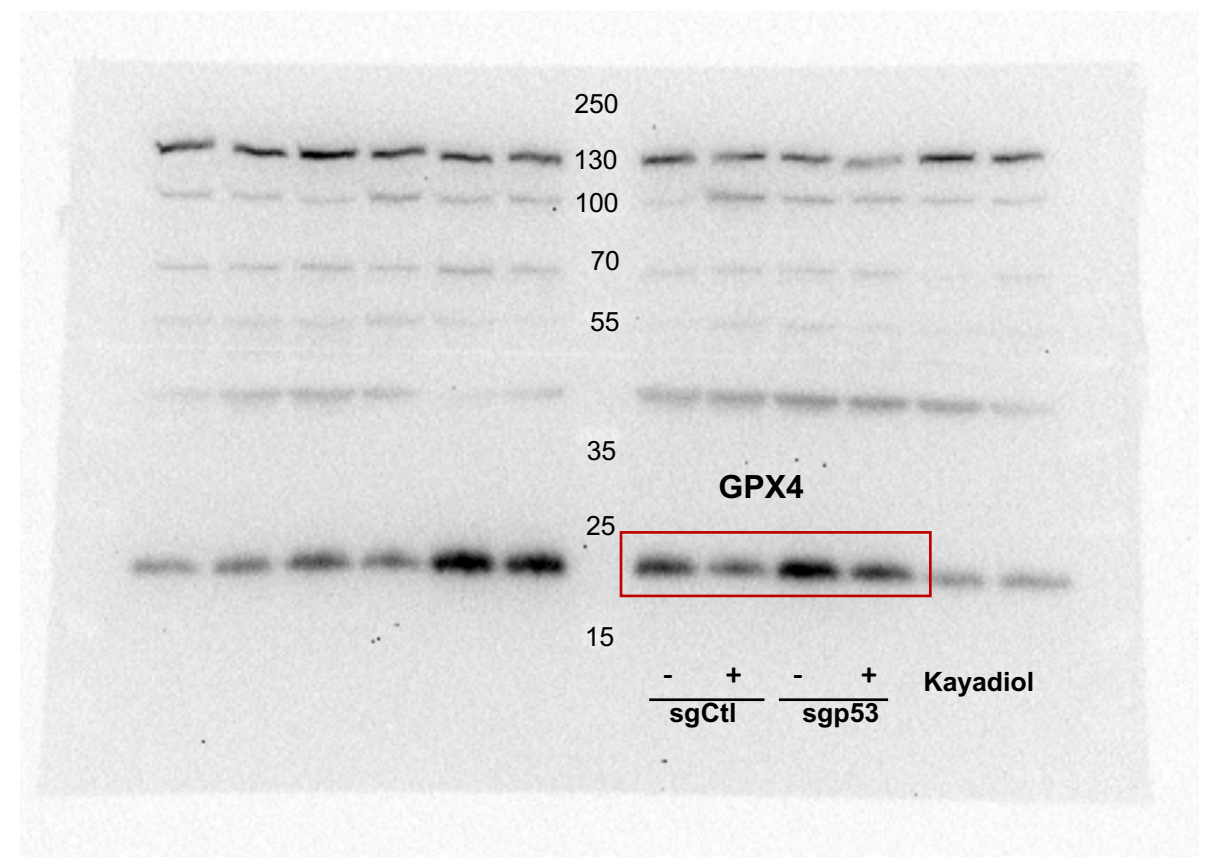

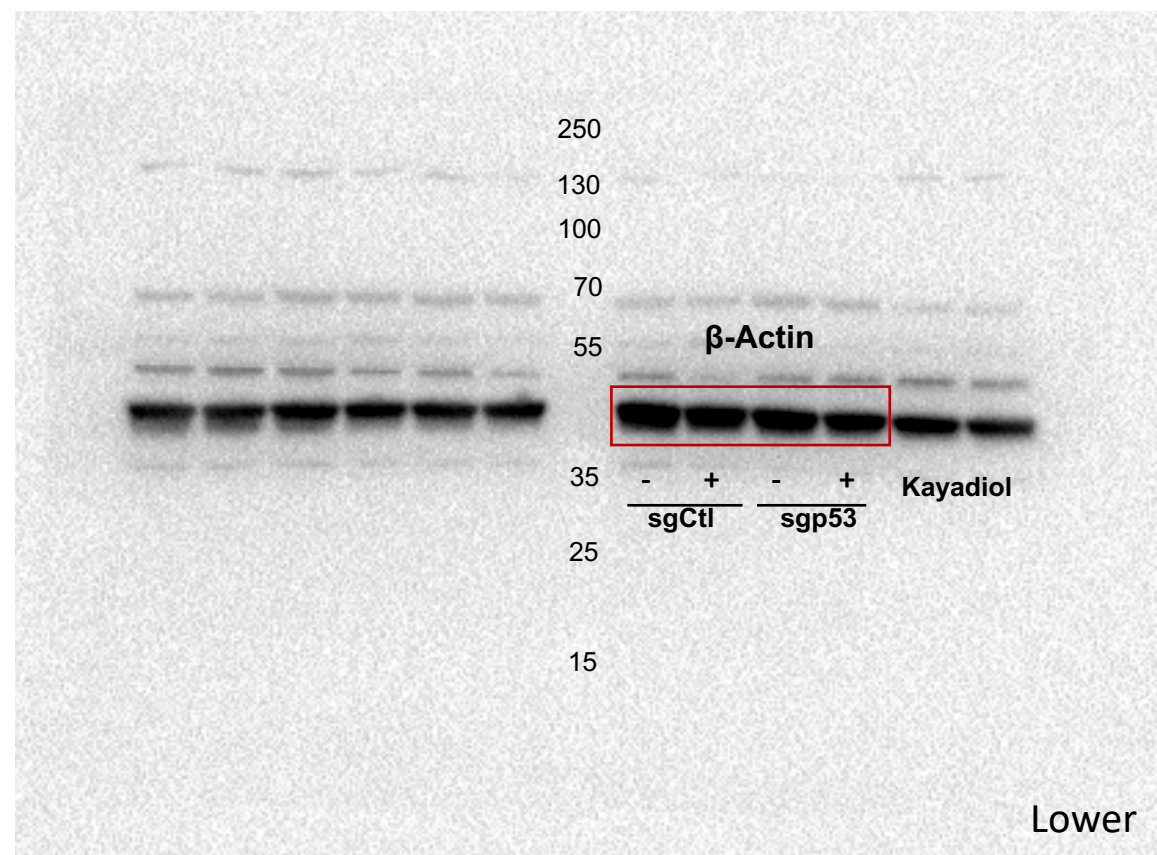

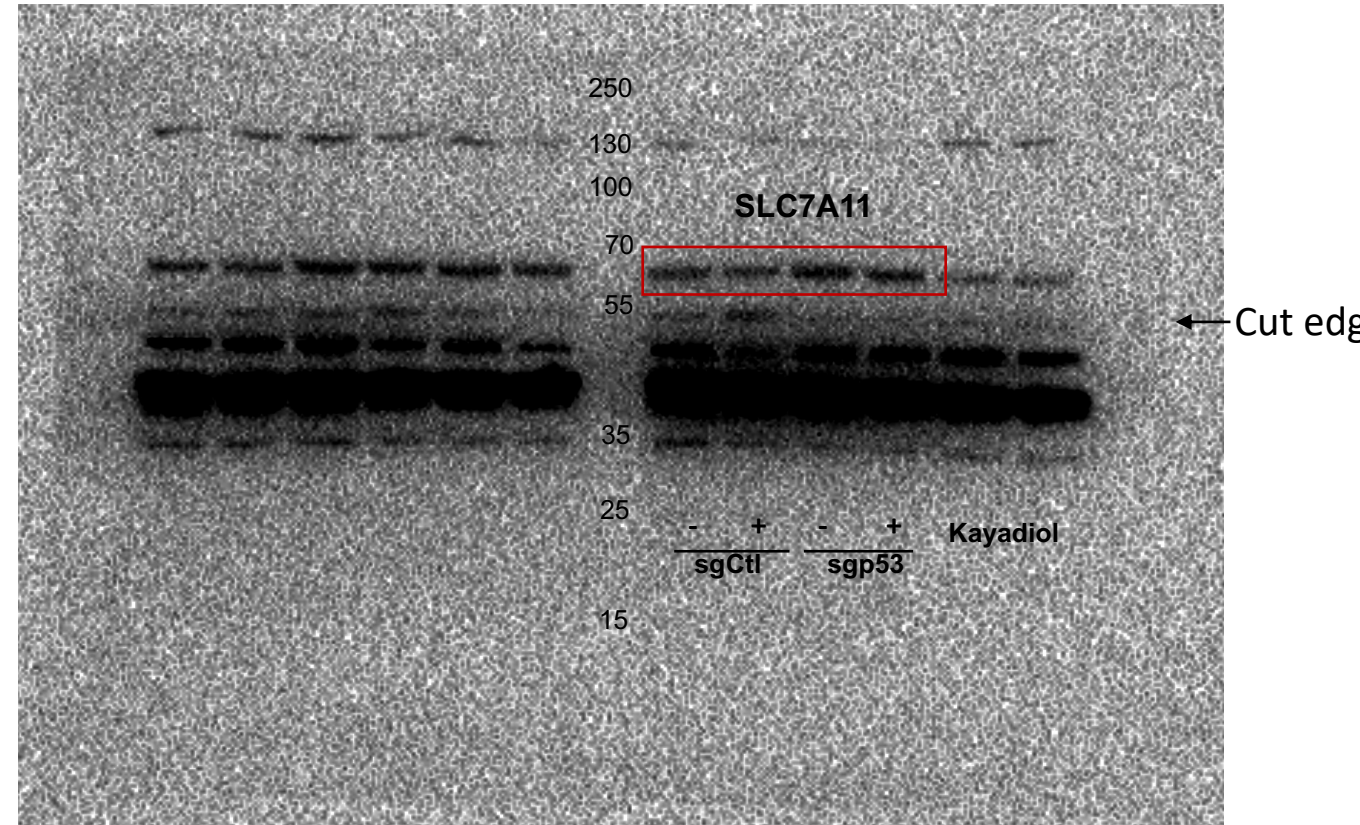

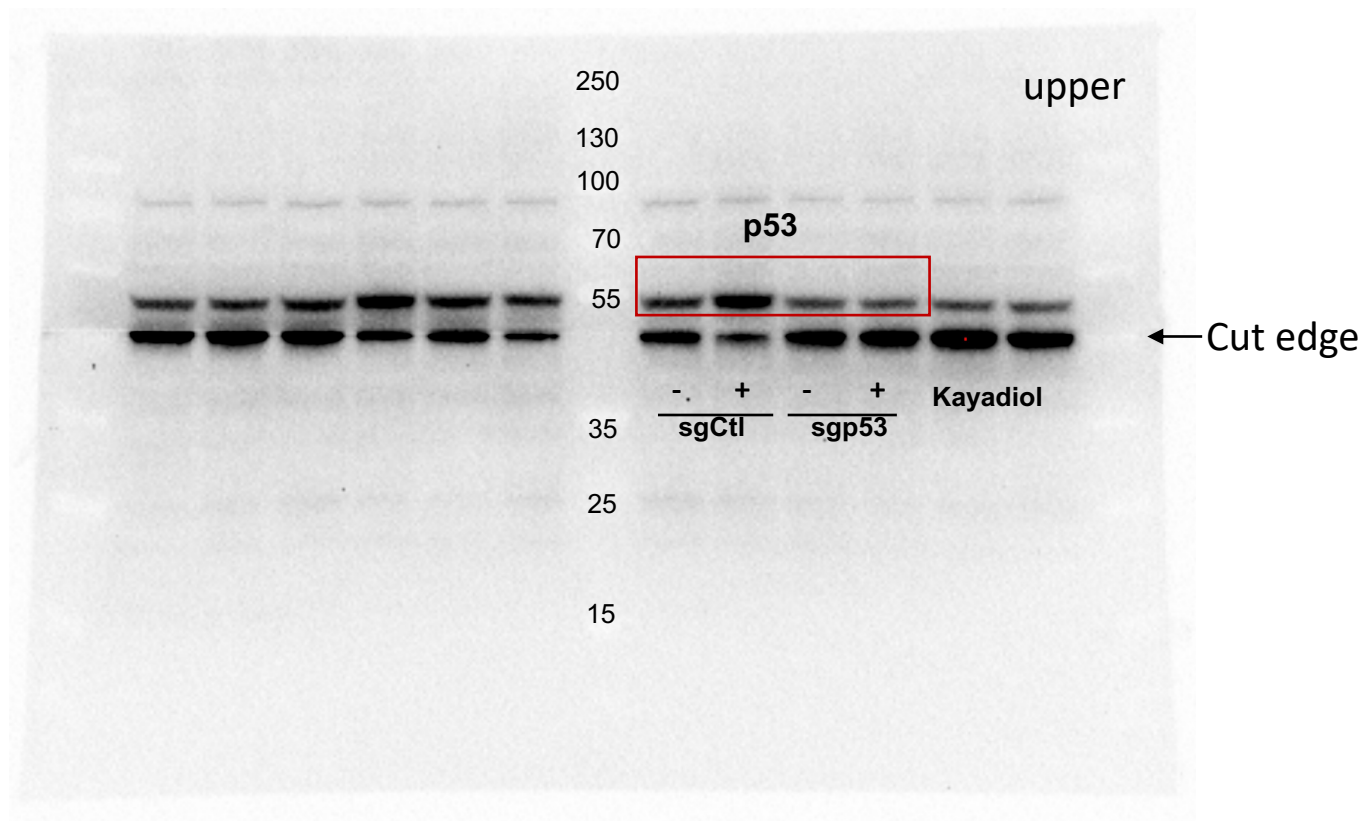

The full-length blots of figure 3B: Western blot for p-p53, p53, SLC7A11, GPX4, and β-Actin from protein lysates of YT cells .

Full-length blots of Figure 4B

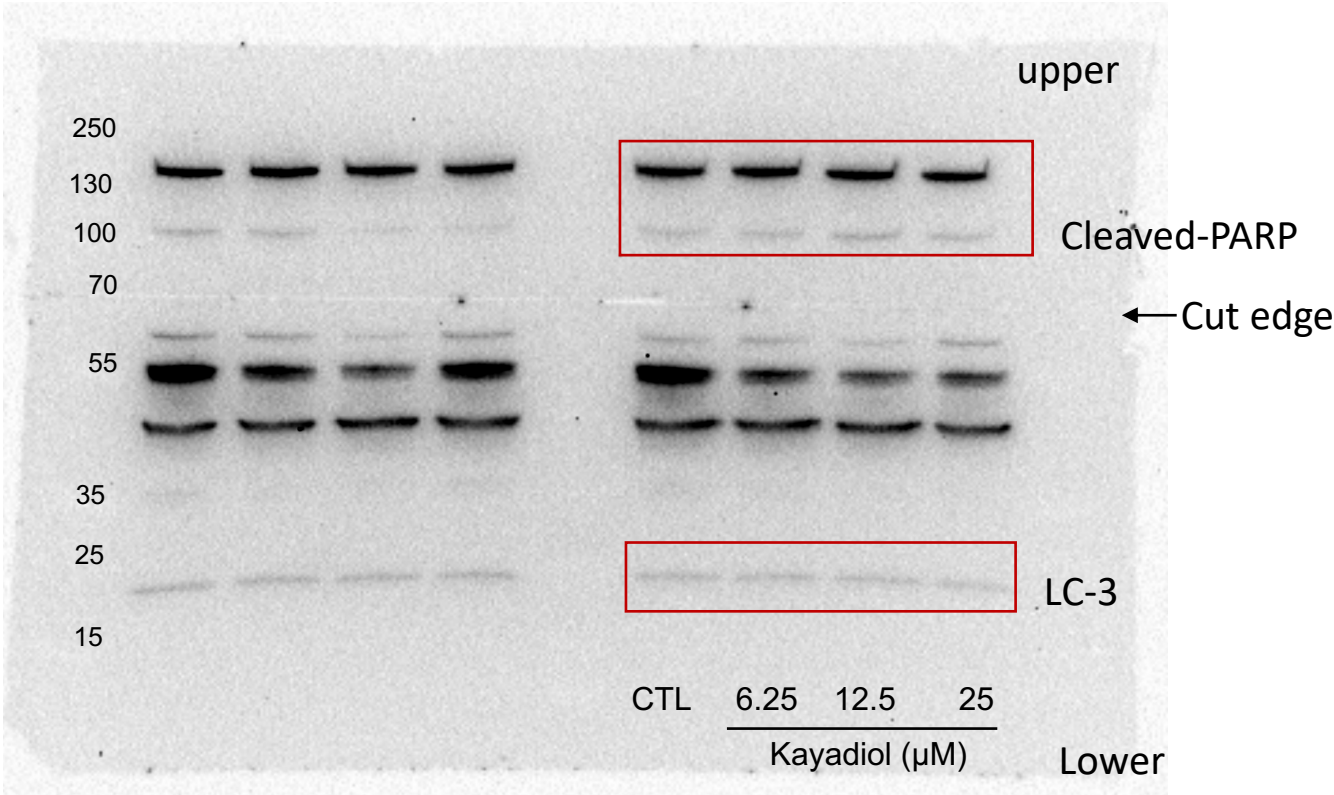

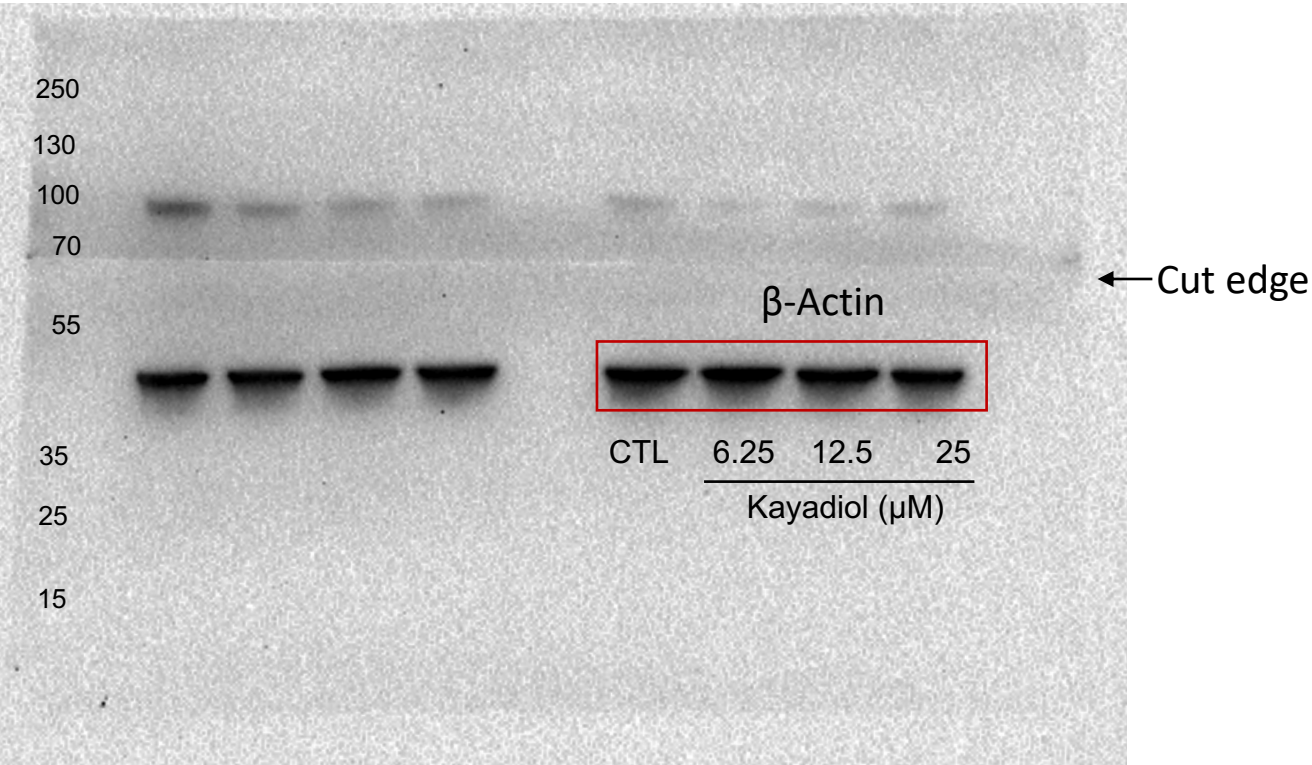

The full-length blots of figure 4B: Western blot for p53, SLC7A11, and β -Actin from protein lysates of YT cells .

Full-length blots of Figure 4D

The full-length blots of figure 4B: Western blot for p53, SLC7A11, GPX4, and β-Actin from protein lysates of YT cells .

Full-length blots of Sup Figure. 1

The full-length blots of figure 4B: Western blot for PARP, LC-3, and β -Actin from protein lysates of YT cells .
