

Supplementary figure 3. Overexpression of CD248 promotes invasion and metastasis of MG63 cells.

(A, B) RT-qPCR and Western blot to examine the expression of CD248 in CD248-overexpressing MG63 cells. (C) Left panel, transwell assay to show the migration of CD248-overexpressing MG63 cells. Right panel, statistical analysis of the number of migrated cells. Representative images were shown. **P < 0.01.
