

Supplementary Fig. S1. Western blot analysis of m⁶A regulator proteins in available PBMCs of PLWH. Detection of (A) m⁶A writer complex, (B) eraser, and (C) reader proteins in available PBMCs from PLWH without cancer (-) (n = 4; samples P17, P20, P21, and P26 listed in Table 2) or with cancer (+) (n = 4; samples P8, P9, P11, and P15 listed in Table 1). The individual protein names and protein molecular weight are labeled. GAPDH served as a loading control.
