

Supplementary Figure 1: Multimodal imaging of Exclusion Case 2: 1a) WF CFP ungradable due to asteroid hyalosis; 1b) En face ARL slab UWF OCTA: patchy nonperfusion areas (green arrows) with IRMAs; 1c) En face VRI slab UWF OCTA: NV at the superotemporal arcade (red box); 1d) Corresponding structural B-scan with flow overlay through the lesion: Lesion breaching ILM attached to the posterior hyaloid with flow signal consistent with NV and confirming the diagnosis of PDR (red arrow). WF CFP: Widefield Colour Fundus Photo; ARL: All-retinal Layer; UWF OCTA: Ultrawide-field Optical Coherence Tomography Angiography; IRMA: Intraretinal Microvascular Abnormality; NV: neovascularization; VRI: Vitreoretinal Interface; PDR: Proliferative Diabetic Retinopathy
