Introduction: [say: thank you for your interaction with the Y-MIND clinician not long ago. I would like to ask you a few questions about your experience interacting with the clinician] 1. What is your general experience about your interaction with the clinician in this session?

2. Did you go through the entire session without breaks?

Comprehensibility 1. Did you understand the things the clinician told you in the session? [ probe: what did you understand or what did you not understand? Also probe for specifics based on your knowledge of the manual specific to the session]

2. Was there any advice or instruction from the clinician that was difficult to understand? Explain

Acceptability

1. How safe and comfortable did you feel during the session?

2. What is your opinion on the place the counselling was delivered? What influence did it have on your experience of the counselling session?

3. What do you think about the length/duration of the session?

4. What do you want to see changed in this session?

Saliency

1. What specific skills or ideas did the clinician share with you? [probe/remind them about the specific skills tailored to the session]

2. How useful were these skills or ideas to you?

3. Which of these skills or ideas did you find useful?

4. Which of these skills or ideas were not useful to you?

5. What was your experience with the homework activity? [if appropriate for the session]

---

Challenges

- 1. What were some of the challenges that you encountered going through the session?
- 2. [ONLY FOR DROPOUTS]: what made you stop receiving the treatment?

---

Facilitators

What were some of the things that helped you in going through and completing this session?

---

General comments

Any general comments/observation about the session?
