Supplemental Table 1. Differences in the proportional change of prevalence between subgroups from 2018 to 2022

	Sex		Academic degree		Trust in media (TV, radio, etc.) in matters of indoor air		Trust in social media in matters of indoor air		Severity of symptoms		
	Women	Men	Yes	No	Full trust	Little trust	Full trust	Little trust	None	Mild	Moderate/severe
Symptoms at work	-20 %	-29 %	-31 %	-18 %	-46 %	-19 %	-25 %	-24 %	-	-	-
Good self-reported indoor air quality at work/place of study	18 %	6 %	12 %	9 %	17 %	11 %	7 %	13 %	6 %	18 %	25 %
Moisture damage at work is a large health risk	-32 %	-40 %	-41 %	-32 %	-45 %	-35 %	-37 %	-36 %	-38 %	-27 %	-22 %
"I'm very worried about the health effects of indoor air in Finland."	-45 %	-35 %	-51 %	-33 %	-46 %	-41 %	-43 %	-42 %	-42 %	-39 %	-25 %
"Health hazards caused by indoor air problems are downplayed in Finland."	-21 %	-28 %	-24 %	-23 %	-25 %	-24 %	-1 %	-26 %	-26 %	-14 %	-3 %
"Indoor air problems are discussed a lot in my circle of acquaintances."	-38 %	-32 %	-44 %	-28 %	-35 %	-37 %	-40 %	-36 %	-35 %	-32 %	-27 %
"My municipality should spend more money on solving indoor air problems, even at the cost of other services."	-35 %	-27 %	-37 %	-28 %	-20 %	-36 %	-4 %	-34 %	-34 %	-37 %	-3 %
"The officials in my municipality don't take indoor air problems seriously enough."	-29 %	-27 %	-38 %	-20 %	-27 %	-29 %	-7 %	-30 %	-32 %	-18 %	0 %
Disagreement with "The assessment of indoor air impurities should be based primarily on the examination of the building and other measurements rather than symptoms."	-25 %	-15 %	-26 %	-21 %	-7 %	-27 %	-12 %	-24 %	-23 %	-24 %	-12 %
Disagreement with "Even minor moisture damage is so harmful to health that immediate action has to be taken."	18 %	28 %	16 %	23 %	-4 %	34 %	-53 %	27 %	20 %	21 %	48 %
Disagreement with "Mere concern about indoor air quality can effect symptoms similar to indoor air symptoms."	-17 %	-26 %	-18 %	-21 %	-13 %	-24 %	-9 %	-22 %	-18 %	-35 %	-6 %
Satisfied with municipality's actions relating to "Quality of construction, and maintenance"	53 %	25 %	56 %	27 %	20 %	46 %	13 %	44 %	28 %	88 %	42 %

light grey: p-value<0.1; dark grey: p-value<0.05. P-values for a test of the difference in change between subgroups. P-values are adjusted for sex, age, and education.
