

Supplementary Information. Full gel/blot photos of the three exposures with and without gray backgrounds. The WB strip in figure 5A comes from this uncropped Gels and Blots image. Followed by AMADTS4(A), AMADTS5(B), MMP2(C), MMP9(D), MMP13(E), and β -Actin(F). Lane 1, 2, 3, 4, and 5 represent the normal group, the sham group, the ACLT group, the ACLT + L group, and ACLT + H group, respectively. Lanes 6 and 7 are repetitions of lanes 3 and 5, respectively.
