

1. **How satisfactory are you regarding the knowledge about dental implant?**
 - a. Very well
 - b. Well
 - c. Moderately well
 - d. Poorly
 - e. Not at all

2. **How much are you aware of complication associated with dental implants**
 - a. Very well
 - b. Well
 - c. Moderately well
 - d. Poorly
 - e. Not at all

3. **What do you think is the most important factor responsible for complication associated with dental implant?**
 - a. Case selection
 - b. Implant type and material
 - c. Patient compliance
 - d. Surgical technique
 - e. Experience of operator
 - f. Do not know

4. **What do you think is the most common early complication associated with dental implant?**
 - a. Permanent altered sensation
 - b. Implant failure
 - c. Unfavourable implant location compromising the prosthetic rehabilitation
 - d. Postoperative infection
 - e. Invasion of maxillary sinus
 - f. life-threatening hemorrhage
 - g. Do not know

5. What do you think is the most common late complication associated with dental implant?

- a. Loss of prosthetic rehabilitation
- b. Implant loss not resulting in the loss of the prosthetic rehabilitation
- c. Massive bone loss related to implant failure
- d. Do not know

6. What do you think is the most common mechanical complication associated with dental implant?

- a. Fracture of implants
- b. Fracture of screws
- c. Fracture of abutments
- d. Screws loosening
- e. Abutment loosening
- f. Fracture bridge frameworks
- g. Do not know

7. What do you think is the most common soft tissue complication associated with dental implant?

- a. Hemorrhage
- b. Nerve injury
- c. Tissue emphysema
- d. Infections
- e. Wound dehiscence
- f. Do not know

8. What do you think is the most common hard tissue complication associated with dental implant?

- a. Periapical implant pathosis
- b. Mandibular jaw fracture
- c. Lack of implant primary stability,
- d. Inadvertent penetration into maxillary sinus or nasal fossa
- e. Complications associated with sinus elevation
- f. Do not know

9. What do you think is the most common aesthetic complication associated with dental implant?

- a. Loss of interdental papilla
- b. Gingival recession
- c. Exposure of implant margin
- d. Restoration too buccal or too palatal
- e. Poor emergence profile
- f. Chronic inflammation
- g. Do not know

10. What do you think is the most common reversible complication associated with dental implant?

- a. Intraoperative complications
- b. Immediate/early postoperative complications
- c. Late postoperative complications
- d. Prosthetic-related (mechanical/biologic) complications
- e. Aesthetic/soft tissue-related complications
- f. Do not know
