

PRISMA 2020 Checklist

Section and Topic	Item #	Checklist item	Location where item is reported
TITLE			
Title	1	Growth factor analysis in children with non-syndromic orofacial clefts: A Systematic Review	Kindly refer to line number 1&2 in the manuscript.
ABSTRACT			
Abstract	2	abstract is written as per author guidelines.	Kindly refer to line numbers 32-57.
INTRODUCTION			
Rationale	3	The rationale for the review in the context of existing knowledge has been described.	Kindly refer to line numbers 104-129.
Objectives	4	An explicit statement of the objective(s) or question(s) the review addresses has been provided.	Kindly refer to line numbers 130-133
METHODS			
Eligibility criteria	5	The inclusion and exclusion criteria for the review and how studies were grouped for the syntheses have been specified.	Kindly refer to line numbers 140-153.
Information sources	6	All databases, registers, websites, organisations, reference lists and other sources searched or consulted to identify studies. Specify the date when each source was last searched has been specified.	Kindly refer to line numbers 155-159.
Search strategy	7	Presented the full search strategies for all databases, registers and websites, including any filters and limits used.	Kindly refer to line numbers 160-163.
Selection process	8	The methods used to decide whether a study met the inclusion criteria of the review, including how many reviewers screened each record and each report retrieved, whether they worked independently, and if applicable, details of automation tools used in the process have been mentioned.	Kindly refer to line numbers 165-167.
Data collection process	9	Specified the methods used to collect data from reports, including how many reviewers collected data from each report, whether they worked independently, any processes for obtaining or confirming data from study investigators, and if applicable, details of automation tools used in the process.	Kindly refer to line numbers 168-170.
Data items	10a	Listed and defined all outcomes for which data were sought. Specify whether all results that were compatible with each outcome domain in each study were sought (e.g., for all measures, time points, analyses), and if not, the methods used to decide which results to collect.	Kindly refer to line numbers 174-184.
	10b	List and define all other variables for which data were sought (e.g. participant and intervention characteristics, funding sources). Describe any assumptions made about any missing or unclear information.	
Study risk of bias assessment	11	Specified the methods used to assess risk of bias in the included studies, including details of the tool(s) used, how many reviewers assessed each study and whether they worked independently, and if applicable, details of automation tools used in the process.	Kindly refer to line numbers 186-196.
Effect measures	12	Specify for each outcome the effect measure(s) (e.g. risk ratio, mean difference) used in the synthesis or presentation of results.	
Synthesis methods	13a	The processes used to decide which studies were eligible for each synthesis (e.g. tabulating the study intervention characteristics and comparing against the planned groups for each synthesis has been described (item #5	Kindly refer to line numbers 197-204.
	13b	Describe any methods required to prepare the data for presentation or synthesis, such as handling of missing summary statistics, or data conversions.	
	13c	Describe any methods used to tabulate or visually display results of individual studies and syntheses.	
	13d	Describe any methods used to synthesize results and provide a rationale for the choice(s). If meta-analysis was performed, describe the model(s), method(s) to identify the presence and extent of statistical heterogeneity, and software package(s) used.	

PRISMA 2020 Checklist

Section and Topic	Item #	Checklist item	Location where item is reported
	13e	Describe any methods used to explore possible causes of heterogeneity among study results (e.g. subgroup analysis, meta-regression).	
	13f	Describe any sensitivity analyses conducted to assess robustness of the synthesized results.	
Reporting bias assessment	14	Describe any methods used to assess risk of bias due to missing results in a synthesis (arising from reporting biases).	Mentioned in the results section 3.3.
Certainty assessment	15	Describe any methods used to assess certainty (or confidence) in the body of evidence for an outcome.	
RESULTS			
Study selection	16a	Describe the results of the search and selection process, from the number of records identified in the search to the number of studies included in the review, ideally using a flow diagram.	Kindly refer to line numbers 206- 210.
	16b	Cite studies that might appear to meet the inclusion criteria, but which were excluded, and explain why they were excluded.	Kindly refer to line numbers 209- 210.
Study characteristics	17	Cite each included study and present its characteristics.	Kindly refer to line numbers 211- 215.
Risk of bias in studies	18	Present assessments of risk of bias for each included study.	Kindly refer to line numbers 216- 228.
Results of individual studies	19	For all outcomes, present, for each study: (a) summary statistics for each group (where appropriate) and (b) an effect estimate and its precision (e.g. confidence/credible interval), ideally using structured tables or plots.	Kindly refer to line numbers 230- 327.
Results of syntheses	20a	For each synthesis, briefly summarise the characteristics and risk of bias among contributing studies.	Kindly refer to Fig2, Fig3 & Table 4.
	20b	Present results of all statistical syntheses conducted. If meta-analysis was done, present for each the summary estimate and its precision (e.g. confidence/credible interval) and measures of statistical heterogeneity. If comparing groups, describe the direction of the effect.	
	20c	Present results of all investigations of possible causes of heterogeneity among study results.	
	20d	Present results of all sensitivity analyses conducted to assess the robustness of the synthesized results.	
Reporting biases	21	Present assessments of risk of bias due to missing results (arising from reporting biases) for each synthesis assessed.	Kindly refer to Table 5, Table 6 & Table 7
Certainty of evidence	22	Present assessments of certainty (or confidence) in the body of evidence for each outcome assessed.	
DISCUSSION			
Discussion	23a	Provide a general interpretation of the results in the context of other evidence.	Kindly refer to line numbers 328- 416.
	23b	Discuss any limitations of the evidence included in the review.	Kindly refer to line numbers 417-419.
	23c	Discuss any limitations of the review processes used.	Kindly refer to line numbers 420-429
	23d	Discuss implications of the results for practice, policy, and future research.	Kindly refer to line numbers 435-440.
OTHER INFORMATION			
Registration and protocol	24a	Provide registration information for the review, including register name and registration number, or state that the review was not registered.	Kindly refer to line numbers 137-138.
	24b	Indicate where the review protocol can be accessed, or state that a protocol was not prepared.	

PRISMA 2020 Checklist

Section and Topic	Item #	Checklist item	Location where item is reported
	24c	Describe and explain any amendments to information provided at registration or in the protocol.	
Support	25	Describe sources of financial or non-financial support for the review, and the role of the funders or sponsors in the review.	The funding statement has been mentioned in the metadata database of the journal as per the author guidelines.
Competing interests	26	Declare any competing interests of review authors.	The Declaration has been mentioned in the database of the journal.
Availability of data, code and other materials	27	Report which of the following are publicly available and where they can be found: template data collection forms; data extracted from included studies; data used for all analyses; analytic code; any other materials used in the review.	The tables and figures to be published are included in the manuscript.
