Questions:

1. What do you think of when you hear the term health technology?
 - If the term is unfamiliar, mention other terms like digital solutions, digital technology, and e-health. Provide concrete examples (apps, video solutions, etc.).
2. What experience do you have with using digital solutions in the follow-up of your child?
 - Do you currently use any form of digital technology/solutions, video, or applications? If yes, describe.
 - Describe freely regardless of health and the child (e.g., school-home, municipal - specialized health services).
 - How is the child involved in the use of digital technology?
 - What do you find positive/advantageous?
 - What could be different? Barriers?
3. What experience do you have with home-based treatment or follow-up of the child?
 - Outside of hospitals or treatment centers.
 - All types of measures, medical, motor, education, delivery of equipment/assistive devices, medications/pharmacy, mobile teams.
 - If you do not have experience, in what way could this be relevant for your child?
4. How do you view/regard the contributions of digital solutions to the communication/collaboration with various services involved in your child's follow-up?
 - What is needed for you to use digital solutions (prerequisites)?
5. What are the most important needs for your family in everyday life?
 - What needs are important: for the child, for siblings, for parents.
 - How can these needs be met?
 - Can digital solutions help meet these needs?
6. Finally, is there anything else you would like to share? Is there a topic you miss, or something else I should have asked about?

Concluding Questions:

- Give the floor to the moderator for questions or elaboration of questions.
- The assistant moderator summarizes the main impressions from the interview with the participants.
