

**Supplementary material: Questions used to assess awareness, perception,
barriers and facilitators to uptake of cervical cancer screening**

1. (*For women only*) You may know that women living with HIV are at greater risk for getting cervical cancer.

a. When was the last time you had a cervical cancer screening?

i. *Probe:* How often have you gotten screened in the last 5 years?

b. (*screened previously*) What led to you getting screened the last time? For example, did your healthcare provider recommend it or did you need to request this service? Please explain.

i. *Probe for those who screened less than every 2 years:* What are your thoughts on being screened more often? Please explain.

c. (*never screened*) Tell me why you never received a screening for cervical cancer.

i. *Probe:* What do you think about cervical cancer screening?

ii. *Probe:* Would you take the cervical cancer screening if offered, why or why not?

iii. *Probe:* Would it matter if it was offered by a male or female provider? Please explain.

d. Do you know other women in your life who have been screened for cervical cancer?

i. *Probe:* Who was it and what was/were their experience(s)?

e. What is the general perception of cervical cancer screening in the community for women?
