

Supplementary Material 4: Individual evaluation of Eve's trust scores (graphically and in table format)

Diagram

Overview of total trust scores across the treatment pathway

Pat. E = Total score trust in physicians – all phases (f=4)	Mean (Median); min/max	3.6 (3.6); 3.2/4
Pat. E = Total score trust in physicians – diagnosis	Score	4
Pat. E = Total score trust in physicians – surgery	Score	4
Pat. E = Total score trust in physicians – adj. radiation	Score	3.2
Pat. E = Total score trust in physicians – follow up	Score	3.2
Pat. E = Total score trust in nurses – all phases (f=4)	Mean (Median); min/max	3.7 (3.6); 3.4/4
Pat. E = Total score trust in nurses – diagnosis	Score	4
Pat. E = Total score trust in nurses – surgery	Score	3.4
Pat. E = Total score trust in nurses – adj. radiation	Score	3.8
Pat. E = Total score trust in nurses – follow up	Score	3.4
Pat. E = Total score trust in organization – all phases (f=4)	Mean (Median); min/max	3.3 (3); 3/4
Pat. E = Total score trust in organization – diagnosis	Score	4
Pat. E = Total score trust in organization – surgery	Score	3
Pat. E = Total score trust in organization – adj. radiation	Score	3
Pat. E = Total score trust in organization – follow up	Score	3

Legend: f=number of questionnaires over all phases.
