

STROBE Statement—Checklist of items that should be included in reports of *cross-sectional studies*

	Item No	Recommendation
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract Yes (page 1, line 2) (b) Provide in the abstract an informative and balanced summary of what was done and what was found Yes (page 2, lines 47-61)
Introduction		
Background/rationale	2	Explain the scientific background and rationale for the investigation being reported Yes (pages 4-6, lines 68-117)
Objectives	3	State specific objectives, including any prespecified hypotheses (page 6, lines 115-120)
Methods		
Study design	4	Present key elements of study design early in the paper (page 6, lines 15-128)
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection (page 6, lines 131-133)
Participants	6	(a) Give the eligibility criteria, and the sources and methods of selection of participants (pages 6-7, lines 136-142)
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable. N/A
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group Yes (page 7, lines 149-203)
Bias	9	Describe any efforts to address potential sources of bias Yes (pages 5-10, lines 122-233)
Study size	10	Explain how the study size was arrived at Yes (page 9, lines 205-209)
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why Yes (page 9, lines 212-213)
Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding (b) Describe any methods used to examine subgroups and interactions (c) Explain how missing data were addressed (d) If applicable, describe analytical methods taking account of sampling strategy (e) Describe any sensitivity analyses Yes (page 10, lines 211-233)
Results		
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed (b) Give reasons for non-participation at each stage (c) Consider use of a flow diagram Yes (pages 10-11, lines 238-241)
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and

		information on exposures and potential confounders
		(b) Indicate number of participants with missing data for each variable of interest Yes (pages 11-12, lines 242-251)
Outcome data	15*	Report numbers of outcome events or summary measures Yes (pages 11-12, lines 247-251)
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included (b) Report category boundaries when continuous variables were categorized (c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period Yes (pages 12-14, lines 260-284)
Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses N/A
Discussion		
Key results	18	Summarise key results with reference to study objectives Yes (page 14, lines 187-292)
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias Yes (page 17, lines 354-364)
Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence Yes (pages 15-16, lines 300-335)
Generalisability	21	Discuss the generalisability (external validity) of the study results Yes (pages 17, lines 354-364)
Other information		
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based N/A (page 18, lines 393-395)

*Give information separately for exposed and unexposed groups.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at <http://www.plosmedicine.org/>, Annals of Internal Medicine at <http://www.annals.org/>, and Epidemiology at <http://www.epidem.com/>). Information on the STROBE Initiative is available at www.strobe-statement.org.
