

Supplemental Figure 1. Neither LPS nor APS had significant effects on INS-1 cell apoptosis. INS-1 cells were treated as indicated for 24 h. Cell apoptosis was evaluated with flow cytometry as described in materials and methods.

Supplemental Figure 2. The effects of LPS and APS on inflammatory factors. INS-1 cells were treated as indicated for 24 h. The mRNA levels of indicated inflammatory factors were determined with qRT-PCR. $n=3$, $^{\#}P<0.05$, $^{##}P<0.01$.
