

Additional file 4. Primary study overlaps within the included systematic reviews in the overview. Full documentation of primary studies (included in the six systematic reviews) regarding research designs, type of interventions, type of participants (student type), sample size and country and which systematic reviews each primary study is included in.

Type of study design

CS – Cross sectional survey

QE - Quasi experimental study

Qual - Qualitative study

MM - Multi Method (qualitative and quantitative methods used)

BA - Before and after study

RCT- Randomized Controlled Trial

NS – Not specified

Intervention

SI – Single Intervention (covering one educational activity)

MI – Multifaceted intervention (covering a combination of educational activities)

NS - Not Specified

Participants

N - Nurse students

NH – Nutrition and Health students

M – Midwifery students
