

Interview Questions:

1. How do you use practice questions and their rationales in your studies?
2. Do you always use practice questions this way or does it change based on other factors?

Research participants will be handed a practice multiple-choice question with rationale.

3. Can you talk me through how you use this practice question to study?

Optional follow-up questions:

4. Can you explain that to me?
5. Can you tell me more about that?
