

Attributes and levels

Attributes	Attribute Levels	Descriptions
Training period	1 day	The number of training days available to CHWs.
	3 days	
	7 days	
Main content of the training	Vaccine Basics	Principles of vaccine production, mechanism of action, function, abnormal post-vaccination reactions, and cold chain transportation.
	Common misconceptions about vaccine safety and rationalizations	Perceived errors and reasonable explanations of vaccines or vaccinations that are common among the vaccinated.
	Communication Skills	How to communicate effectively with vaccinees.
Training Methods	Web-based Online Training	Training Models Available to CHWs.
	On-site Knowledge Seminars	
	Case Discussion and Scenario Simulation	
Scale of training	Small Scale	Less than 50 participants.
	Medium Scale	50-100 participants.
	Large Scale	More than 100 participants.
Training Effectiveness	No feedback	Feedback on the effectiveness of the training is given only at the end of the training.
	Final feedback only	
	Stage Feedback	Feedback on the effectiveness of the training is given in stages throughout the training.

This section invites you to consider the vaccine communication training program you would like to receive in your work. Assuming that you are required to undergo a vaccine communication training course for community health workers, there are two options for the training program. These two training options differ only according to the characteristics outlined below. All other characteristics not mentioned are the same.

Please take a moment to read about the features of these vaccine communication training programs listed below.

You may not like any of the training programs, but we'd like you to state which one you think is better!

Training options: which training program do you prefer?			
	Training A	Training B	Training C
training period	7days	3days	None
Main content of the training	Communication skills training	Common misconceptions about vaccine safety and rationalizations	None
Training Methods	Case Discussion and Scenario Simulation	On-site Knowledge Seminars	None
Scale of training	Large scale: more than 100 participants	Medium scale: 50-100 participants in training	None
Training Effectiveness Feedback	Stage-by-stage feedback on the effectiveness of individual training	Only final feedback on the effectiveness of individual training	None
In your opinion, which of the above training programmes do you prefer?	☐	☐	☐
