

ORCB Program – Self Reported Questionnaire

This form is for the participants who participated in the ORCB-1 program designed and delivered jointly by Seva Foundation, Seva Canada and IIPH-H.

The participants must respond to the questions INDIVIDUALLY and NOT in a group. Your response will be completely anonymous.

***Indicates a required question**

1. Rate your competency for the below-mentioned items **before you joined the ORCB program**. Response 5 indicates the highest level of competency, whereas 1 indicates the lowest level of competency. *

Provide a single rating for each.

Domains	5	4	3	2	1
Literature review					
Formulating research questions					
Sampling techniques					
Manuscript writing					
Study designs					
Data collection tools					
Sample size calculation					
Data analysis					

2. Rate your competency for the below-mentioned items **after you completed the ORCB program**. Response 5 indicates the highest level of competency, whereas 1 indicates the lowest level of competency. *

Provide a single rating for each.

Domains	5	4	3	2	1
Literature review					
Formulating research questions					
Sampling techniques					
Manuscript writing					
Study designs					
Data collection tools					
Sample size calculation					
Data analysis					

3. Did you contribute to designing any study or protocol development **after the ORCB program?** *

Mark only one oval.

Yes

☐ No/ Not planned

☐ Planned

4. If your answer is 'yes' to the previous question, which part of the research did you contribute to?(Choose all that apply). **Leave it blank if your answer is not 'yes'.**

Select all that apply.

Contribution type	(√)
Literature search	
Formulating the research question and objectives	
Identifying epidemiological study design	
Designing tools for data collection	
Sample size calculation/ Sampling technique	
Data analysis plan	

5. Did you do any data analysis at your hospital **after the ORCB program?** *

Mark only one oval.

- ☐ Yes
☐ No/ Not planned
☐ Planned

6. Have you trained any hospital staff or students **after completing the ORCB program?** *

Mark only one oval.

- ☐ Yes
☐ No/ Not planned
☐ Planned

7. If your answer is 'yes' to the previous question, which of the following training you have imparted? (Choose all that apply) **Leave it blank if your answer is not 'yes'.**

Select all that apply.

Contribution type	(✓)
Literature search	
Formulating the research question and objectives	
Identifying epidemiological study design	
Designing tools for data collection	
Sample size calculation/ Sampling technique	
Data analysis plan	

8. Did you take part in any manuscript writing **after the ORCB program?** *

Mark only one oval.

- ☐ Yes
☐ No/ Not planned
☐ Planned

9. The following question identifies areas that may serve as either motivating factors/enablers and challenges depending upon the context and individual perception. We want to know if these factors influenced your research practice since you have completed the ORCB program. Provide a single score for each between 0-9, where '0' represents the lowest score of support or improvement in research practices and '9' indicates the highest. *

Motivating factors/enablers and challenges	Score (0-9)
Hospital provided dedicated space for research	
Improvements in self-motivation level	
Better co-ordination among research team	
Hospital improved the internet connectivity for research	
Time management by self for research	
Improvement in monitoring & evaluation of research activities	
Hospital provided better access to books & journals	
Hospital provided statistical support and support for research	
Workload management by hospital authority	
Hospital provided additional funding for research	
Provision of incentives from institute for research work
