A 30-year-old man presents to the emergency room with shortness of breath and a mild fever. As a medical student, what questions should you ask him?

Items	Score	Student Score
ask when the shortness of breath started?		
ask about the severity of the shortness of breath?		
ask about the cough accompanied by shortness of breath?		
ask about the fever accompanied by shortness of breath?		
ask the patient if he/she had recently been in contact with a person with COVID-19 in the family?		
ask about the patient's history of underlying diseases such as high blood pressure, diabetes, and heart disease, and the patient's age?		
ask if the patient had recently had symptoms such as a cold or sore throat?		
ask if your respiratory condition is better today than yesterday?		
ask what tasks the shortness of breath has made difficult for you?		
Did you ask about the patient's vital signs such as temperature, heart rate, and respiratory rate?		
ask if he/she has pain when breathing?		
Did you ask about accompanying gastrointestinal symptoms?		
recommend isolation and wearing a mask?
