

## **Focus group interview with group leaders in ICDP (International Caregiver Development Program) in nursing homes**

**Target group:** nursing home employees who have participated in supervisor training in ICDP

**Number of participants in the focus group:** 9

**Purpose:** Seek to gain knowledge about the group leaders' experiences with the group leader role, the implementation of ICDP and the relevance of the intervention for employees in elderly care.

**Time:** After completion of the internship period, as well as submission of log, reflection and theoretical requirements.

*The focus group interview is **conducted with two moderators**. One of the moderators controls the floor, the other observes, asks follow-up questions and makes sure that everyone has a chance to speak.*

**Bring** a dictaphone and writing paper – write down key words during the dialogues.

### **Semi-structured qualitative interview**

#### **Interview guide**

When you think back to the supervisor training in ICDP:

What experiences and thoughts do you have about group leader training in ICDP?

- The content
- Pedagogy/methodology
- The sensitization exercises
- The implementation principles and sensitization principles
- Confidence in participating in group leader training and ICDP groups for employees
- The importance of the researcher's presence in the group meetings
