

CHIPPS study Coding summary

Main code	Sub code		Number of participants in that code	Number of times a code mentioned by participants
Implementation			25	166
	Care home study procedure		18	61
	GP study procedure		11	26
	Services provided by PIP		14	43
Mechanisms of Impact			19	114
	Biochemical monitoring		14	17
	Care home workload due to interventions		11	38
	Medication changes made		28	80
	GP tasking items to PIPs		10	22
	Staff training		20	27
	Non patient facing activities undertaken by PIPs		17	60
		Authorising repeat prescription	16	24
		Completing PCP	9	23
		Tasking items to GPs	6	6
		Liaising with Community Pharmacists	13	22
		Liaising with Primary Care practice staff	7	9
		Review of medication systems	7	8
		Reviews of stock	6	6
Outcomes			24	125
	Adding to multidisciplinary practice		30	81
	Case studies improvement to residents		29	71
	Case studies planned change not successful		10	10
	Ordering system changes		14	27
	Care home satisfaction with intervention		15	70
		Mixed	2	2

		Negative	1	1
		Neutral	1	4
4		Positive	15	71
	GP satisfaction with intervention		8	45
		Mixed	4	5
		Negative	4	8
		Neutral	0	0
		Positive	9	38
	PIP Satisfaction with intervention		14	41
		Mixed	8	8
		Negative	4	7
		Neutral	1	11
		Positive	11	26
Intervention safety				
	Care home perspective		9	16
	GP perspective		9	28
	PIP perspective		9	21
Contextual factors				
	Barriers to delivery		31	86
	Facilitators to delivery		22	75
	Care home staff awareness of intervention		20	46
	GP workload impact		19	47
	Impact of patient factors on delivery		16	25
	Impact of site factors on delivery		25	55
Communication			25	154
	Care home to PIP		24	96
	GP to CH		9	11
	PIP to CH		24	113
	PIP to GP		21	52
	PIP to others		23	63
Intervention normalised			26	59

	Actions taken by PIPs to ensure normalises		10	17
		Adapted working with CH	18	29
		Adapted working with GPs	8	10
		Adaptive working with others	5	7
Professionals roles			24	78
Legacy of Intervention			23	47
Geographical difference			14	23
