

Qualitative Survey

Record ID

Name of ECHO Interviewee

(e.g. Maria Corcorran)

Name of ECHO Program

(e.g. UW Hep C ECHO)

Why did you establish an ECHO program?

How does your ECHO programme fit into a national or regional programme for viral hepatitis elimination?

How has your programme evolved since its inception?

Do you train all cadres of healthcare workers/providers in one ECHO session, or do you have separate sessions?

Approximately how many hours per week do you and your staff spend on your Project ECHO programme?

Do you keep information on the clinical questions and scenarios asked? If so, how is this information used?

What other types of data do you have on your programme?

What were some of the major challenges in setting up and implementing the programme, and how have you overcome them?

What have been some of the major challenges and barriers to success?

What do you see as the main positive features of your ECHO programme:

What do you see as the future directions of your ECHO programme?
