

Interview guide, focus group semi structured interview

Research question: Which service tasks would care-receivers with physical disabilities` accept or not accept to be delivered by a robot? What are their perceptions on receiving robot assistance in their homes?	
The participants receive information about the project, their rights, the time frame as well as practical information, and get the opportunity to ask questions.	
The participants fill out a form with name, age, diagnosis, and tick off activities they receive help in and how often.	
Opening questions (goal: getting everyone to talk effortlessly throughout the interview, this will not be analyzed)	1. Tell us your name, age and what you do on a daily basis. (Round)
Introductory questions	2. "In this group, there are many different experiences with assistance in daily activities that it would be interesting to hear a little more about. Will one of you start by telling a little about these experiences and about the help you receive." 3. How often do you get help with this?
Transitional issues	4. Are there any tasks you don't get assistance in today that you would like to get help with?
FILM WITH DEMONSTRATION OF EVE THE ROBOT	
Key questions	5. If we imagine that it will not be possible to get as much help as today- Imagine that a robot, ie EVE was one of the services who could help you. If any, what kind of tasks do you see a robot helping you with? 6. What kind of robot assistance could have an impact on your independence? 7. Are there any tasks you would prefer getting help from a robot rather than a human? 8. What tasks wouldn't you let a robot help with, and why? 9. You've told us a little bit about getting help with, are there any things you wish you could get help with right away/that it is challenging to wait to get help for? 10. What do you think about the fact that a robot resembles a human being? 11. What do you think are the practical limitations or disadvantages of having a robot at home? Examples
Concluding Questions	12. We have now talked about... . is there anything else you'd like to add about this that we haven't touched on, or that you haven't been able to say so far?
Summarize and request verification	

Questioning route after Kruger and Casey 2015.
