

Ventral expression, external.
Blastopore to about 2/3
to the animal pole.
About 1/3 of the total
circumference.

Broader ventral expression
to the archenteron and in
the ectoderm.

Even broader ventral
expression to the top of the
archenteron and beyond.

Gradient of expression in
ventral ectoderm.
Still in ventral
endomesoderm.

Similar to 19hrs.

Additional staining in ventro-lateral somites.
