

A word cloud visualization of protein names. The most prominent (largest) word is RBM45, located in the center. Other large words include RBM3, RBM15B, HNRNPA0, and PABPC4. The words are arranged in a circular pattern, with smaller words filling the gaps between the larger ones. The colors of the words vary, with RBM45 being dark blue, RBM3 being light blue, RBM15B being green, HNRNPA0 being yellow, and PABPC4 being red. The background is white.

| RBP     | Binding site frequencies |
|---------|--------------------------|
| RBM45   | 13                       |
| RBMS3   | 10                       |
| YBX1    | 9                        |
| DAZAP1  | 9                        |
| NUPL2   | 8                        |
| IGF2BP2 | 8                        |
| HNRNPD  | 8                        |
| HNRNPA0 | 8                        |
| ZFP36   | 7                        |
| SART3   | 7                        |
