

## MCT Study - Visit 1 - Questionnaire

### Introduction

#### Welcome to our study visit!

First of all, we want to thank you for being a part of our clinical study on the effects of dietary supplements on canine epilepsy. We are very pleased that you have decided to support us in our challenge of developing effective non-drug treatments for canine epilepsy.

Clinical trials are an essential part of this process, and our study is looking at the effects of an oil, given daily as a supplement to your dogs diet, on the seizure activity and behaviour of your dog. In order to evaluate the efficacy of this oil as a treatment, we are interested in detailed information about your dog's seizure characteristics, behaviour, activity, gait and appetite.

**As part of this study, we invite you now to complete this survey exploring the following five characteristics of your dog:**

1. Temperament and Behaviour
2. Activity and Attention
3. Ageing Behaviour
4. Appetite
5. Quality of Life

We would be grateful if you could complete each questionnaire once. For your answers to be of use you have to complete the full list of questionnaires, which is estimated to take around 1 hour.

We very much appreciate your help in this study. If you have any queries regarding the questions, do not hesitate to contact Dr Benjamin-Andreas Berk ([bberk@rvc.ac.uk](mailto:bberk@rvc.ac.uk)) directly.

#### Data Protection and Consent

The data collected in this questionnaire will be collated and stored at the Royal Veterinary College in London (RVC). Your completion of the questionnaire indicates your consent to participate in this study. Your data will be anonymized as appropriate, and your contact details will be used only to contact you, if

we need clarification of the answers to any questions forming part of this questionnaire or inform you about our decision.

Your personal information will be held and used in accordance with the Data Protection Act 1998 and will not be disclosed to any unauthorized person or body. We are happy to send you an electronic summary of the study results (by email only) at the end of the official clinical study.

Only the principal investigators in this study (Prof Holger Volk, Dr Benjamin-Andreas Berk, Dr Rowena Packer) will have access to the data on the returned questionnaires. The anonymous results of the will be published on the RVC website and in a journal. N.B. The study was approved by the Clinical Research Ethical Review Board (CRERB) and ethical approval has been granted (URN 2016 1558).

## MCT Study - Visit 1 - Questionnaire

### About You

\* 1. Please type in your full name, plus your dogs name:

Forename

Surname

Dog name

2. Which Investigation Centre are you completing the study at?

\* 3. What is your dog's Study Number?

4. Which visit is this today?

\* 5. Date of completion of the questionnaire

Date

6. In which country do you and your dog reside?

**\* 7. Please select your gender**

- ☐ Male
- ☐ Female
- ☐ Prefer not to say

**\* 8. Please select your age range**

- ☐ 18-30
- ☐ 31-45
- ☐ 46-60
- ☐ 61-75
- ☐ over 76
- ☐ Prefer not to say

## MCT Study - Visit 1 - Questionnaire

### Your dog

\* 9. Is your dog pure-bred or cross-bred?

- ☐ Pure-bred
- ☐ Cross-bred

## MCT Study - Visit 1 - Questionnaire

### Your dog 2

10. If your dog is pure-bred, is your dog registered with a breed association or kennel club in your country?

- ☐ Yes
- ☐ No
- ☐ I don't know
- ☐ Other (please specify)

\* 11. What breed is your dog?

If your breed is not listed please state here. If your dog is cross-bred then please state the breeds it is bred from here, if known.

\* 12. What sex is your dog

- ☐ Female entire
- ☐ Female neutered
- ☐ Male entire
- ☐ Male neutered
- ☐ Chemically neutered.

13. If your dog is neutered, at what age was it neutered?

\* 14. How old is your dog, please state as XX years XX months?

15. How old was your dog when you bought/rehomed them?

16. What is your dogs weight in kilograms (to the nearest kg)?

17. Is your dog currently on any prescribed medication other than routine worming/vaccinations, or anti-epileptic drugs used to control your dog's epilepsy?

☐ Yes

☐ No

If yes, what medications? (please list brand names where possible)

18. Does your dog have health insurance?

☐ Yes

☐ No

☐ I don't know

## MCT Study - Visit 1 - Questionnaire

### Veterinary history

\* 19. Has your dog ever had a seizure?

- ☐ Yes
- ☐ No
- ☐ I don't know

\* 20. Has your dog been diagnosed with epilepsy by a vet?

- ☐ Yes
- ☐ No

## MCT Study - Visit 1 - Questionnaire

### Epilepsy diagnosis

\* 21. To your knowledge, has your dog had 2 or more seizures (if only 2, they were at least 24 hours apart)?

☐ Yes

☐ No

\* 22. Was your dog's first seizure between the ages of 6 months and 6 years?

☐ Yes

☐ No

\* 23. Has a vet carried out blood and urine tests on your dog and found no identifiable cause for his/her seizures?

☐ Yes

☐ No

## MCT Study - Visit 1 - Questionnaire

### Your dog's epilepsy

\* 24. How old was your dog when the first seizure occurred? (If not known, select 'Unknown')

25. How many fits has your dog had in total? (if a precise number has not been recorded, please estimate to the nearest 10). If completely unknown, select 'Unknown'

26. Which vet did you see to discuss your dog's seizures?

- ☐ My local vet(s) only
- ☐ My local vet(s) AND a Neurology Specialist
- ☐ Please specify - Name, Clinic/ Practice:

\* 27. Which of the following tests were carried out by your vet(s) to diagnose epilepsy? Tick all that apply

- ☐ Blood tests (haematology, biochemistry, bile acids etc.)
- ☐ Urine tests
- ☐ MRI scan of the brain
- ☐ CT scan of the brain
- ☐ Lumbar puncture/ Cerebrospinal fluid (CSF) analysis
- ☐ Tests were done, but I am uncertain of the details

**\* 28. What was the diagnosis for your dog's seizures?**

- ☐ Idiopathic epilepsy (i.e. no cause found)
- ☐ Other causes e.g. a brain tumour, liver problems, a stroke, meningitis

**29. When did your dog last have a seizure?**

- ☐ Within the last 24 hours
- ☐ Within the last 7 days
- ☐ 8-14 days ago
- ☐ 15-21 days ago
- ☐ 22-28 days ago
- ☐ 1-3 months ago
- ☐ 4-6 months ago
- ☐ 7-12 months ago
- ☐ Over 12 months ago
- ☐ I don't know

**30. Approximately how many seizures has your dog had in the past three months?**

**\* 31. Has your dog ever had more than one seizure in one day (24 hour period) - also known as a 'cluster seizure'?**

- ☐ No - only one fit has ever occurred within 24 hours
- ☐ Yes - more than one fit has occurred within 24 hours
- ☐ I don't know

**\* 32. Has your dog ever experienced a seizure that lasted for longer than 5 minutes?**

- ☐ Yes
- ☐ No
- ☐ I don't know

**\* 33. Has your dog ever had two or more seizures in a row without fully regaining consciousness in between them?**

- ☐ Yes
- ☐ No
- ☐ I don't know

**34. Does your dog currently receive any medication to treat their epilepsy?**

☐ Yes

☐ No

## MCT Study - Visit 1 - Questionnaire

### Epilepsy treatment

\* 35. Does your dog CURRENTLY receive any of the following epilepsy medications? (Tick as many as apply)

- |                                                                  |                                       |
|------------------------------------------------------------------|---------------------------------------|
| <input type="checkbox"/> Imepitoin (Pexion)                      | <input type="checkbox"/> Pregablin    |
| <input type="checkbox"/> Phenobarbital (Epiphen, Phenoleptil)    | <input type="checkbox"/> Chlorazepate |
| <input type="checkbox"/> Potassium Bromide (Epilease, Libromide) | <input type="checkbox"/> Felbamate    |
| <input type="checkbox"/> Levetiracetam (Keppra)                  | <input type="checkbox"/> Phenytoin    |
| <input type="checkbox"/> Zonisamide                              | <input type="checkbox"/> Lamotrigine  |
| <input type="checkbox"/> Gabapentin                              | <input type="checkbox"/> Tiagabine    |
| <input type="checkbox"/> Diazepam                                | <input type="checkbox"/> Vigabatrin   |

**36. What doses of medication is your dog currently receiving to control the seizures?**

Please copy the information written on the bottles for all medication including medication name, medication strength, dose and frequency. Start with the most recent and end at the oldest medication he got.

**EXAMPLE**

Medication: Epiphen, 60mg tablet, 2 tablets, twice daily

|            |                      |
|------------|----------------------|
| Medication | <input type="text"/> |
| Medication | <input type="text"/> |
| Medication | <input type="text"/> |
| Medication | <input type="text"/> |
| Medication | <input type="text"/> |
| Medication | <input type="text"/> |
| Medication | <input type="text"/> |

**37. When did your dog's current epilepsy medication regime commence (N.B. If your dog is on ONE medication, the date this was started. If your dog is on MORE THAN ONE medication, the date that their most recent medication was added first, then the second one.**

Date

Date

Date

Date

Date

**38. How many seizures per month (on average) did your dog have BEFORE this date?**

**39. How many seizures per month (on average) has your dog had SINCE this date?**

40. Does your dog experience side effects from their anti-epileptic medication, and if so, how severe are they? If your dog did not show this side effect, please tick 'not present'. Please tick ALL that apply.

|                                       | Not present           | Very Mild             | Mild                  | A moderate amount     | Severe                | Very Severe           |
|---------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| Eating more / would like to eat more  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Gaining weight                        | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Drinking more                         | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Urinating more                        | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Sleeping more than before             | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Wobbly / not coordinated when walking | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Restlessness / pacing                 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Itchiness or skin rash                | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Vomiting                              | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Diarrhoea                             | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Coughing                              | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

## MCT Study - Visit 1 - Questionnaire

### Your dog's seizures

41. Think about the most common type of seizure your dog has. Which signs does your dog show during this type of seizure? Select ALL that apply

- |                                                     |                                                        |                                                      |
|-----------------------------------------------------|--------------------------------------------------------|------------------------------------------------------|
| <input type="checkbox"/> Falls on the floor         | <input type="checkbox"/> Rhythmic blinking             | <input type="checkbox"/> Defecates                   |
| <input type="checkbox"/> Body goes floppy/limp      | <input type="checkbox"/> Head shaking                  | <input type="checkbox"/> Pupils dilate               |
| <input type="checkbox"/> Body goes stiff            | <input type="checkbox"/> Twitching of one leg          | <input type="checkbox"/> Fearful/anxious behaviour   |
| <input type="checkbox"/> Running/paddling movements | <input type="checkbox"/> Excessive salivation/drooling | <input type="checkbox"/> Fly snapping                |
| <input type="checkbox"/> Facial twitches            | <input type="checkbox"/> Vomits                        | <input type="checkbox"/> Doesn't respond to my voice |
| <input type="checkbox"/> Chewing movements          | <input type="checkbox"/> Urinates                      | <input type="checkbox"/> Cannot look me in the eye   |
| <input type="checkbox"/> Other (please specify)     |                                                        |                                                      |

42. How long do your dog's most common type of seizures last on average? (in minutes)

43. On a scale of 1 (very mild) to 7 (very severe), please rate how severe your dog's most common type of seizures are on average

|          | 1 - Not at all severe | 2 - Very mild         | 3 - Mild              | 4 - Moderate          | 5 - Severe            | 6 - Very Severe       | 7 - Could not be worse | N/A                   |
|----------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|------------------------|-----------------------|
| Severity | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>  | <input type="radio"/> |

**44. What signs does your dog show while recovering from their most common type of seizure? Select ALL that apply. If your dog is normal immediately after a seizure select 'None of the above'**

**My dog is:**

- |                                                     |                                           |                                                                  |
|-----------------------------------------------------|-------------------------------------------|------------------------------------------------------------------|
| <input type="checkbox"/> wobbly/ ataxic             | <input type="checkbox"/> fearful /scared  | <input type="checkbox"/> thirsty                                 |
| <input type="checkbox"/> disorientated              | <input type="checkbox"/> aggressive       | <input type="checkbox"/> clingy/wants more attention than normal |
| <input type="checkbox"/> staring                    | <input type="checkbox"/> restless /pacing | <input type="checkbox"/> Normal - none of the above              |
| <input type="checkbox"/> blind /can't see very well | <input type="checkbox"/> sniffing         |                                                                  |
| <input type="checkbox"/> sleepy                     | <input type="checkbox"/> hungry           |                                                                  |

**45. How long does it take for your dog to COMPLETELY recover from their most common seizure type?**

**My dog:**

- |                                                                                           |                                                                                          |
|-------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------|
| <input type="radio"/> is usually completely back to normal within minutes after the fit   | <input type="radio"/> is usually completely back to normal within 24 hours after the fit |
| <input type="radio"/> is usually completely back to normal within 1-6 hours after the fit | <input type="radio"/> is usually completely back to normal within 48 hours after the fit |
| <input type="radio"/> is usually completely back to normal within 6 hours after the fit   | <input type="radio"/> usually takes more than 48 hours to recover completely             |

### Your dog's behaviour: Temperament and Behaviour - 1

\* 46. How often does your dog do the following?

|                                                                    | Never                 | Seldom                | Sometimes             | Usually               | Always                |
|--------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| Returns immediately when called while off leash                    | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Obeys a sit command immediately                                    | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Obeys a stay command immediately                                   | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Will fetch or attempt to fetch sticks, balls and other objects     | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Seems to attend to or listen closely to everything you say or does | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Is slow to respond to correction or punishment                     | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Is slow to learn new tricks or tasks                               | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Is easily distracted by interesting sights, sounds or smells       | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

\* 47. Does your dog ever react aggressively to the following situations?

|                                                                                                       | Never                 | Seldom                | Sometimes             | Usually               | Always                |
|-------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| When approached directly by an unfamiliar male adult while being walked or exercised on a lead        | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When approached directly by an unfamiliar female adult while being walked or exercised on a lead      | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When approached directly by an unfamiliar child while being walked or exercised on a lead             | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Toward unfamiliar persons approaching the dog while it is in the owner's car                          | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When an unfamiliar person approaches the owner or a member of the owner's family at home              | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When an unfamiliar person approaches the owner or a member of the owner's family away from home       | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When mailmen or other delivery workers approach the home                                              | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When strangers walk past the home while the dog is in the garden                                      | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When joggers, cyclists, roller skaters, or skateboarders pass the home while the dog is in the garden | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

|                                                                          | Never                 | Seldom                | Sometimes             | Usually               | Always                |
|--------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| Toward unfamiliar persons visiting the home                              | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When approached directly by an unfamiliar dog of the same or larger size | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When approached directly by an unfamiliar dog of a smaller size          | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

**\* 48. Does your dog ever respond aggressively to the following situations?**

|                                                                                | Never                 | Seldom                | Sometimes             | Usually               | Always                |
|--------------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| When verbally corrected or punished by a member of the household               | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When toys, bones, or other objects are taken away by a member of the household | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When bathed or groomed by a member of the household                            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When approached directly by a member of the household while it is eating       | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When food is taken away by a member of the household                           | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When stared at directly by a member of the household                           | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When stepped over by a member of the household                                 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When a member of the household retrieves food or objects stolen by the dog     | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

## MCT Study - Visit 1 - Questionnaire

### Your dog's behaviour: Temperament and Behaviour - 2

**\* 49. Please assess the following situations and determine how likely your dog is to respond in a fearful or anxious way:**

|                                                                                 | Never                 | Seldom                | Sometimes             | Usually               | Always                |
|---------------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| When approached directly by an unfamiliar male adult while away from the home   | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When approached directly by an unfamiliar female adult while away from the home | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When approached directly by an unfamiliar child while away from the home        | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When unfamiliar persons visit the home                                          | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| In response to sudden or loud noises                                            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| In heavy traffic                                                                | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| In response to strange or unfamiliar objects on or near the pavement            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| During thunderstorms                                                            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When first exposed to unfamiliar situations                                     | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| In response to wind or wind-blown objects                                       | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

**\* 50. Does your dog display the following behaviour?**

|                                                                                                       | Never                 | Seldom                | Sometimes             | Usually               | Always                |
|-------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| Shaking, shivering, or trembling when left or about to be left on its own                             | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Excessive salivation when left or about to be left on its own                                         | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Restlessness, agitation, or pacing when left or about to be left on its own                           | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Whining when left or about to be left on its own                                                      | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Barking when left or about to be left on its own                                                      | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Howling when left or about to be left on its own                                                      | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Chewing or scratching at doors, floor, windows, and curtains when left or about to be left on its own | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Loss of appetite when left or about to be left on its own                                             | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

**\* 51. Which category best describes your dog's behaviour?**

|                                                                                                         | Never                 | Seldom                | Sometimes             | Usually               | Always                |
|---------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| Displays a strong attachment for a particular member of the household                                   | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Tends to follow a member of household from room to room about the house                                 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Tends to sit close to or in contact with a member of the household when that individual is sitting down | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

|                                                                                                              | Never                 | Seldom                | Sometimes             | Usually               | Always                |
|--------------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| Tends to nudge, nuzzle, or paw a member of the household for attention when that individual is sitting down. | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Becomes agitated when a member of the household shows affection for another person                           | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Becomes agitated when a member of the household shows affection for another dog or animal                    | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Acts aggressively toward cats, squirrels, and other animals entering its garden                              | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Chases cats if given the chance                                                                              | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Chases birds if given the chance                                                                             | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Chases squirrels and other small animals if given the chance                                                 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Tends to nudge, nuzzle, or paw a member of the household for attention when that individual is sitting down. | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

## MCT Study - Visit 1 - Questionnaire

### Your dog's behaviour: Temperament and Behaviour - 3

\* 52. Does your dog respond in a highly excitable way to the following situations?

|                                                                   | Never                 | Seldom                | Sometimes             | Usually               | Always                |
|-------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| When a member of the household returns home after a brief absence | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When playing with a member of the household                       | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When the doorbell rings                                           | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Just before being taken for a walk                                | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Just before being taken on a car trip                             | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When visitors arrive at its home                                  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

**\* 53. Does your dog react in a fearful or anxious way to the following situations?**

|                                                     | Never                 | Seldom                | Sometimes             | Usually               | Always                |
|-----------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| When examined or treated by a veterinarian          | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When having its claws clipped by a household member | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| When groomed or bathed by a household member        | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

## MCT Study - Visit 1 - Questionnaire

### Your dog's behaviour: Activity and Attention

\* 54. Please indicate how often each statement is true for your dog.

|                                                                                                                                        | Never                 | Sometimes             | Often                 | Very often            |
|----------------------------------------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| Your dog has difficult time learning, because it is careless or other things can easily attract its attention.                         | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| It is easy to attract its attention, but it loses its interest soon.                                                                   | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| It is difficult for it to concentrate on a task or play.                                                                               | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| It leaves from its place when it should stay.                                                                                          | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| It can not be quiet, it can not be easily calmed.                                                                                      | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| It fidgets all the time.                                                                                                               | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| It seems that it does not listen even if it knows that someone is speaking to it.                                                      | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| It is excessive, difficult to control, if it lunges, it is hard to hold back.                                                          | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| It would always play and run.                                                                                                          | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| It solves simple tasks easily, but it often has difficulties with complicate tasks, even of to know them and has practiced them often. | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| It is likely to react hastily and that is why it is failing tasks.                                                                     | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Its attention can be easily distracted.                                                                                                | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| It can not wait as in it has no self-control.                                                                                          | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

**55. Training qualification the dog has had:**

**Please indicate whether the dog passed an exam or just participated in training.**

- ☐ Trained at home
- ☐ No training
- ☐ Agility
- ☐ Hunting
- ☐ Schutzhund
- ☐ Obedience
- ☐ Other (please specify)

## MCT Study - Visit 1 - Questionnaire

### Your dog's behaviour: Ageing Behaviour

\* 56. How often does your dog show the following behaviours?

|                                                                                                       | Never                 | Once a month          | Once a week           | Once a day            | > Once a day          |
|-------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| How often does your dog pace up and down, walk in circles and/or wander with no direction or purpose? | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| How often does your dog stare blankly at the walls or floor?                                          | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| How often does your dog get stuck behind objects and is unable to get around?                         | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| How often does your dog fail to recognise familiar people or pets?                                    | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| How often does your dog walk into walls or doors?                                                     | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| How often does your dog walk away while, or avoid, being patted?                                      | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

**\* 57. Please rate the following question based on how your dog behave:**

Never      1-30% of times      31-60% of times      61-99% of times      Always

How often does your dog have difficulty finding food dropped on the floor?

☐      ☐      ☐      ☐      ☐

**58. Compared with 6 months ago, does your dog show the following behaviours?**

Much less      Slightly less      The same      Slightly more      Much more

Compared with 6 months ago, does your dog now pace up and down, walk in circles and/or wander with no direction or purpose?

☐      ☐      ☐      ☐      ☐

Compared with 6 months ago, does your dog now stare blankly at the walls or floor?

☐      ☐      ☐      ☐      ☐

Compared with 6 months ago, does your dog urinate or defecate in an area it has previously kept clean (if your dog has never house-soiled, tick 'the same')?

☐      ☐      ☐      ☐      ☐

Compared with 6 months ago, does your dog have difficulty finding food dropped on the floor?

☐      ☐      ☐      ☐      ☐

Compare with 6 months ago, does your dog fail to recognise familiar people or pets?

☐      ☐      ☐      ☐      ☐

Compared with 6 months ago, is the amount of time your dog spends active?

☐      ☐      ☐      ☐      ☐

## MCT Study - Visit 1 - Questionnaire

**Your dog's behaviour:**  
**Appetite**

**\* 59. Please score the following situations with your dog:**

|                                                                                  | Never                 | Rarely                | Sometimes             | Often                 | Always                |
|----------------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| My dog gets excited when there is food around                                    | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog spends most of his/her walks off the lead                                 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog gets human leftovers in his/her food bowl                                 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog hangs around for titbits even if there is not much chance of getting them | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog is choosy about which titbits he eats                                     | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog hangs around when I am preparing or eating human food                     | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog will turn down food if s/he is not hungry                                 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog finishes a meal straight away                                             | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog inspects unfamiliar foods before deciding whether to eat them             | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog runs around a lot                                                         | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| After a meal my dog is still interested in eating                                | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog takes his/her time to eat a meal                                          | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog eats titbits straight away                                                | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog gets bits of human food when we are eating                                | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

**60. Please score the following situations with your dog:**

|                                                                                  | Not at all true       | Somewhat true         | Mainly true           | Definitely true       |
|----------------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| My dog would eat anything.                                                       | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog is very fit.                                                              | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog often gets human food.                                                    | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog gets an upset tummy on some foods.                                        | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| I think my dog could do with losing some weight.                                 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog's walks are mostly on the lead.                                           | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| I restrict my dog's exercise because of veterinary advice.                       | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| I alter the food my dog gets in order to control his/her weight.                 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog seems to be hungry all the time.                                          | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog's walks involve a lot of energetic play or chasing.                       | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| I am careful about my dog's weight.                                              | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog has a sensitive stomach.                                                  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog is very greedy.                                                           | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog regularly sees the vet for health problems.                               | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| I am happy with my dog's weight.                                                 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| I weigh or measure how much food I give my dog.                                  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| I am careful to regulate the exercise my dog gets in order to keep him/her slim. | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

|                                                               | Not at all true       | Somewhat true         | Mainly true           | Definitely true       |
|---------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| My dog gets a lot of exercise.                                | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog often gets tummy upsets.                               | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog gets no food at human mealtimes.                       | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| My dog would eat non-food objects like stones, toys or socks. | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

61. How greedy is your dog? Please grade your dog on a scale of 0 - 10, where 0 is not at all greedy and 10 is as greedy as a dog can get.

62. Use this box to tell us anything about your dog's eating behaviour, weight, or management that you think is important.

## MCT Study - Visit 1 - Questionnaire

### Your dog's behaviour: Quality of Life - 1

#### \* 63. Seizure severity and frequency

|                                                                             | Strongly agree        | Partly agree          | Agree                 | Partly disagree       | Strongly disagree     |
|-----------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| In the last 3 months, the frequency of the fits in my dog was acceptable:   | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| In the last 3 months, the severity of the fits in my dog was acceptable:    | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| In the last 3 months, overall, the fits in my dog are managed successfully: | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Overall, how severe were your dog's fits in the past 3 months?              | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

#### 64. Adverse effects of antiepileptic drugs

|                                                                                                           | Very mild                        | Mild                  | Moderate              | Severe                | Very severe           |
|-----------------------------------------------------------------------------------------------------------|----------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| In the past 3 months, the adverse effects of the medication to control the fits in my dog were acceptable | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| In the past 3 months, how severe was the following overall adverse effect:                                | <input type="radio"/>            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Eating more/would like to eat more                                                                        | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Gaining weight                                                                                            | <input type="radio"/>            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Drinking more                                                                                             | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Urinating more                                                                                            | <input type="radio"/>            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Sleeping more than before                                                                                 | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Wobbly/not coordinated when walking                                                                       | <input type="radio"/>            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Restlessness/pacing                                                                                       | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Itchiness or skin rash                                                                                    | <input type="radio"/>            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Vomiting                                                                                                  | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Diarrhea                                                                                                  | <input type="radio"/>            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Coughing                                                                                                  | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

## MCT Study - Visit 1 - Questionnaire

### Your dog's behaviour: Quality of Life - 2

#### \* 65. Restrictions on the carer's life (related to caring for a dog with idiopathic epilepsy):

|                                                                                                                                            | Never                 | Rarely                | Sometimes             | Often                 | Very often            |
|--------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| In the past 3 months, how often did you feel that your dog's epilepsy caused conflict with your work, education, or day-to-day activities? | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| In the past 3 months, how often did you feel that your dog's epilepsy limited your social life?                                            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| In the past 3 months, how often did you feel that your dog's epilepsy limited your independence?                                           | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

**66. Frustrations over caring for a dog with idiopathic epilepsy:**

|                                                                                     | Not at all<br>bothersome | Somewhat<br>bothersome | Bothersome            | Mainly<br>bothersome  | Extremely<br>bothersome |
|-------------------------------------------------------------------------------------|--------------------------|------------------------|-----------------------|-----------------------|-------------------------|
| My limitations in work, education or day-to-day activities because of my dog's fits | <input type="radio"/>    | <input type="radio"/>  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>   |
| My social limitations because of my dog's fits                                      | <input type="radio"/>    | <input type="radio"/>  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>   |
| Overall, the limitations on my life caring for my epileptic dog                     | <input type="radio"/>    | <input type="radio"/>  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>   |

**67. Owner distaste of antiepileptic drugs adverse effects:**

|                                                                      | Not at all<br>bothersome | Somewhat<br>bothersome | Bothersome            | Mainly<br>bothersome  | Extremely<br>bothersome |
|----------------------------------------------------------------------|--------------------------|------------------------|-----------------------|-----------------------|-------------------------|
| How bothersome are the physical effects of the medication on my dog? | <input type="radio"/>    | <input type="radio"/>  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>   |
| How bothersome are the mental effects of the medication on my dog?   | <input type="radio"/>    | <input type="radio"/>  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>   |

**68. Owner distaste of AED adverse effects - In the past 3 months, how much did you dislike the following adverse effects?**

|                                     | Not at all            | Slightly              | Moderately            | Very                  | A lot                 |
|-------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| Eating more/would like to eat more  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Gaining weight                      | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Drinking more                       | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Urinating more                      | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Sleeping more than before           | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Wobbly/not coordinated when walking | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Restlessness/pacing                 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Coughing                            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

## MCT Study - Visit 1 - Questionnaire

### Your dog's behaviour: Quality of Life - 3

#### \* 69. Carer anxiety around the seizure event (and its effects on the dog):

|                                                                           | Strongly agree        | Partly agree          | Agree                 | Partly disagree       | Strongly disagree     |
|---------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| In the last 3 months, I worried about the frequency of the fits in my dog | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| In the last 3 months, I worried about the severity of the fits in my dog  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

#### 70. Perceptions of rectal diazepam use:

|                                                                                            | Never                 | Rarely                | Sometimes             | Often                 | Very often            |
|--------------------------------------------------------------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| Have you ever been uncertain when to give rectal diazepam?                                 | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Have you ever been worried how much or how often you are supposed to give rectal diazepam? | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

## MCT Study - Visit 1 - Questionnaire

### Thank you and data information

Thank you very much for your time and effort in answering the big questionnaire. Please **save the date of your next visit in your diary!** We look forward to seeing you at the next visit!

Your data will be used only for the current study and the results will be published in a veterinary journal. Summaries of the results will be made available on the RVC website.

If you have any questions, please contact Dr. Ben Berk by [bberk@rvc.ac.uk](mailto:bberk@rvc.ac.uk). We wish you and your dog the best for the first dietary intervention period.
