All measurements are in millimetres. F1: Total body length of adult worm; F2: Length of oesophageal region of body; F3: Width of esophageal region of body; F4: Maximum width of posterior region of body (thickness); F5: Body width in the place of junction of oesophagus and the intestine; F6: Distance from the head end to beginning of bacillary stripes; F7: Length of bacillary stripes; F8: Length of vagina; F9: Diameter of vulva turned over the surface of body; F10: Distance of vulva from place of junction of oesophagus and the intestine; F11: Distance of posterior loop of uterus from tail end of body; F12: Distance of tail end of body and posterior fold of seminal receptacle; F13: Length of muscular zone of the oesophagus. B: standard deviation. X: arithmetic mean. Min: Minimum value; Max: Maximum value.
