

Related group and time effects and group: time effect interaction for taking and timing adherence with puff inhalers and dry powder capsules

	ANOVA- type Statistic	df	<i>p</i> value	Statistic	df	<i>p</i> value
	Puff inhalers (N=117)			Dry powder capsules (N=90)		
Taking adherence						
Group	6.3	1.0	0.01	7.9	1.0	0.005
Time	1.2	39.5	0.20	1.0	24.3	0.40
Group:Time	0.8	39.5	0.80	1.1	24.3	0.40
Timing compliance						
Group	15.3	1.0	<0.001	7.6	1.0	0.006
Time	1.1	36.14	0.30	1.3	29.9	0.10
Group:Time	0.9	36.14	0.60	1.2	29.9	0.20

Group effect for the intervention and control group. Panel A: taking adherence with puff inhalers; Panel B: taking adherence with dry powder capsules. Panel C: timing adherence with puff inhalers; Panel D: timing adherence with dry powder capsules
