

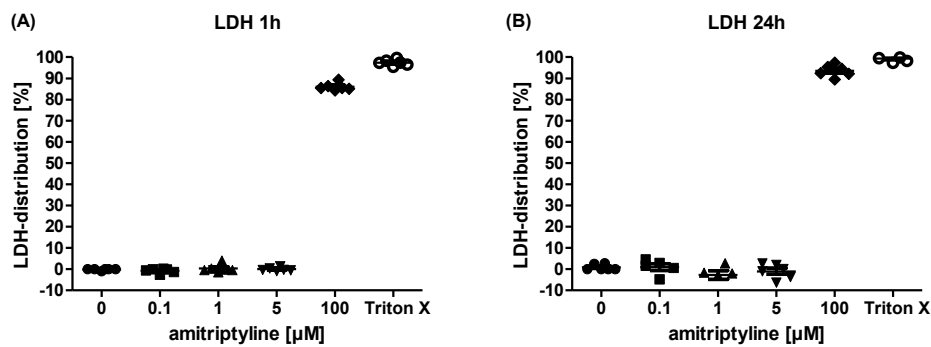

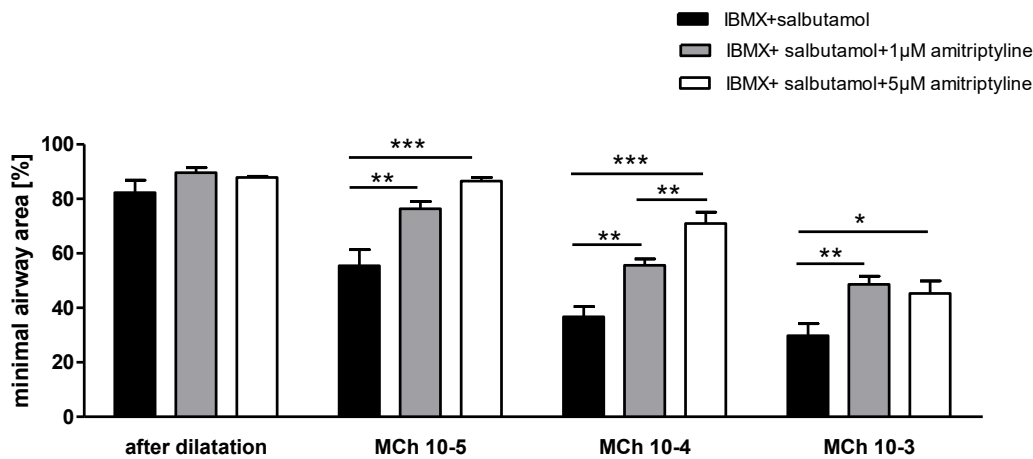

Fig. S1

Supplemental Fig. 1: Amitriptyline (0.1-5 μM) is not toxic in rat PCLS.
(A) LDH toxicity tests after 1h and (B) 24h. n=9 in all groups.

Fig. S2

Supplemental Fig. 2: Dilatation with IBMX/salbutamol and combinative therapies. (A) Minimal airway area after dilatation and stimulation with rising concentrations of methacholine. n=4 in all groups. All graphs represent means $\pm$ SEM; *p < 0.05, ***p<0.001.
