

ADDITIONAL FILE 2

Additional file 2 Levey-Jennings plot for LW-1 assay in the DCCT study. The plot consists of injection number on the x-axis (i.e., from 1 to 357 in consecutive order over the six week course of the HPLC assay) vs. integrated peak areas on the y-axis (relative fluorescence at ex/em 348/463 nm) for all samples injected (n=216 DCCT + n=42 nondiabetic controls + n=13 repeats), LQC (n=13), HQC (n=14), LW-1 QC standard (n=49) and enzyme blanks (n=10).
