

Additional file 2: Figure S2. SDS-PAGE analysis of genes expression (A) Protein samples of *E. coli* YHP05 harboring pYHP and pHB-CA (lane 1) and *E. coli* YHP05 harboring pYHP and pHB-CA-FDC (lane 2). (B) Protein samples of *E. coli* YHP05 harboring pYHP and pHB-CA –FDC (lane 1) and *E. coli* YHP05 harboring pYHP-FDC and pHB-CA (lane 2). Lanes M, T and S represent molecular weight markers (kDa), total and soluble fractions, respectively. Closed and open arrowheads indicate ScFDC and SmPAL enzymes, respectively.
